Vendor: Check Point

Exam Code: 156-715.70

Exam Name: Check Point Certified Endpoint Expert R70
(Combined SA, FDE, MI, ME)

Version: DEMO

QUESTION 1
How many authorized logins are needed to create recovery media in Full Disk Encryption?

A. One
B. Four
C. Three
D. Two

Answer: D

QUESTION 2
What are the names of the Full Disk Encryption processes and services that run on a workstation after FDE has been installed?

A. Pssogina.exe, protect.exe and p95tray.exe
B. Decrypt.exe, protect.exe, pssogina.exe, and pagents.exe
C. Prot_srv.exe, p95tray.exe and pstartsr.exe
D. pagents.exe, psadmin.exe and decrypt.exe

Answer: C

QUESTION 3
Which of the three Full Disk Encryption services running on the local machine provides encryption and decryption during install and uninstall?

A. Prot_srv.exe
B. PstartSr.exe
C. P95Tray.exe

Answer: A

QUESTION 4
Which of the three Full Disk Encryption services running on the local machine allows Full Disk Encryption to push recovery files and poll for update profiles?

A. PstartSr.exe
B. Prot_srv.exe
C. P95Tray.exe

Answer: C

QUESTION 5
From which of the three Full Disk Encryption services running on the local machine is the monitoring program accessible to end users?

A. Prot_srv.exe
B. P95Tray.exe
C. PstartSr.exe

Answer: B

QUESTION 6
"Data at rest" exists in all the following scenarios, EXCEPT:

A. For data stored on a Full Disk Encryption protected internal hard drive.
B. For data residing in swap files for Full Disk Encryption protected applications.
C. For data not in use by a Full Disk Encryption protected application.
D. For data in use by a Full Disk Encryption protected application.

Answer: D

QUESTION 7
Which data-protection method provides an effective deterrent to illicit network access via network-connected machines, especially if these machines are linked as part of a VPN?

A. File encryption
B. Full disk encryption
C. User authentication
D. Boot protection

Answer: C

QUESTION 8
Which of the following answers is NOT a correct description of aspects of the drive-encryption process?

A. Encryption takes place only AFTER the Recovery file is off-loaded.
B. Encryption functions as a throttled background service.
C. Moving your mouse over the FDE icon will show the amount of the drive encrypted.
D. The amount of data encrypted per hour is dependent on the amount of free drive space available.

Answer: A

QUESTION 9
Which of the following accurately describes the boot process on a Full Disk Encryption equipped system?

A. POST, BIOS, MBR, MFAE, PBR
B. POST, BIOS, MBR, PBR, PPBE
C. POST, BIOS, MFAE, MBR, PBR
D. POST, BIOS, MBR, PBR, MFAE

Answer: B

QUESTION 10
Which of the following examples is NOT a risk associated with a hard drive that is only protected

with Boot Protection/Authentication?

A. Brute force attacks by linking the drive to a separate bootable drive.
B. Bypassing the protection by booting from a floppy.
C. Illicit access to the drive, which can be gained via network connectivity.
D. BIOS passwords, which are weak and susceptible to attacks.

Answer: C
