

Oracle

Exam 1z0-409

Oracle Linux Fundamentals (Oracle PartnerNetwork)

Version: 4.0

[Total Questions: 230]

Topic 1, Volume A

Question No : 1 - (Topic 1)

You located a file created in /home successfully by using the slocate command. You found that the slocate command could locate that file even after deletion. What could be the possible solution to stop listing deleted files? (Choose all that apply.)

- A. Run updatedb to update the database.
- B. Run slocate -u to update the database.
- C. Use the locate command instead of slocate.
- D. Delete the /var/lib/slocate/slocate.db file because it buffers all search results.
- E. Reboot the system so that it will update the kernel memory because the kernel stores all results in the memory.

Answer: A,B

Question No : 2 - (Topic 1)

As an administrator, you mounted the /exports/projects NFS exported directory from a server on a LAN using the default NFS settings. You find the performance to be low. Which NFS mount options can you use to increase the performance?

- A. set rsize=8192 and wsize=8192.
- B. set rsize=32768 and wsize=32768.
- C. set wsize=8192 and keep the read packet size at the default.
- D. set rsize=8192 and keep the write packet size at the default.
- E. set rsize=32768 and keep the write packet size at the default.
- F. set wsize=32768 and keep the read packet size at the default.

Answer: A

Question No : 3 - (Topic 1)

Two users, bob on station1 and smith on station2, generated a public/private key pair using ssh-keygen to enable password-less secure shell login between them. What would be their next step to accomplish the task?

- A. Copy the private key of bob to station2:~smith and vice versa.
- B. Copy the key pair of bob to station2:~smith/.ssh as public and private keys.

- C. Copy the private key of bob to station2:~smith/.ssh/authorized_keys and vice versa.
- D. Copy the public key of bob to station1:~smith/.ssh/authorized_keys and vice versa.
- E. Copy the public key of bob to station2:~smith/.ssh/authorized_keys and vice versa.

Answer: E

Question No : 4 - (Topic 1)

View the Exhibit.

As a Linux administrator, you have to let the users smith and scott manage files and directories in the /software directory on their own, with full permissions between each other's files. What are the most essential steps needed to grant them the required privileges? (Choose all that apply.)

```
[root@server1 ~]# groups smith scott
smith : smith apps
scott : scott
[root@server1 ~]# ls -ld /software/
drwx----- 2 root apps 4096 Mar  8 05:42 /software/
[root@server1 ~]#
```

- A. Add SUID on /software.
- B. Add 777 permissions on /software.
- C. Add u=--- permissions on /software.
- D. Add scott as a member of the apps group.
- E. Add rwx permissions for the apps group on /software.

Answer: D,E

Question No : 5 - (Topic 1)

View the Exhibit.

A normal user bob logs in from server200 to server1 through telnet and runs the xclock command but fails with an error message as shown in the Exhibit.

What could be the possible reason for the error?

```
[bob@server200 ~]$ telnet server1
Trying 192.168.0.100...
Connected to server1.example.com (192.168.0.100).
Escape character is '^]'.
Enterprise Linux Enterprise Linux AS release 4 (October Update 4)
Kernel 2.6.9-42.0.0.0.1.EL on an i686
login: bob
Password:
Last login: Wed Apr  4 16:57:33 from server200
[bob@server1 ~]$ xclock
Error: Can't open display: server200.example.com:0.0
[bob@server1 ~]$
```

- A. This is because gdm is not started on the machine.
- B. This is because of the temporary failure in name resolution.
- C. This is because the default X access controls do not permit remote connections.
- D. This is because the graphical display manager is not configured to allow TCP connections.

Answer: D

Question No : 6 - (Topic 1)

What is the effect of issuing ZZ and ZQ in the vi editor command mode?

- A. The command ZZ will zoom in the vi editor command mode and ZQ will zoom out the view.
- B. The command ZZ will thrash all changes, whereas ZQ will ask for confirmation before saving.
- C. The command ZZ will save changes and exit, whereas ZQ will exit the editor without saving changes.
- D. The command ZZ will exit the editor without saving changes, whereas ZQ will save changes and exit.

Answer: C

Question No : 7 - (Topic 1)

You have logged in as root and have invoked the mount command without any options to mount the device /dev/hda8

```
mount /dev/hda8
```

What does mount do in this context? (Choose two.)

- A. It checks the /etc/mtab for the required options to mount the device.
- B. It checks the /etc/fstab for the required options and the mount point to mount the device.
- C. It checks the /etc/inittab for the required options and the mount point to mount the device.
- D. It reports an error message "mount point doesn't exist" if the entry for /dev/hda8 doesn't exist in the /etc/fstab file.

Answer: B,D

Question No : 8 - (Topic 1)

Which command would you use to save the name of all the users in your system in alphabetical order to a newfile file after removing the duplicate entries?

- A. `cut -f1 -d: /etc/passwd | sort | uniq | > newfile`
- B. `cut -f1 -d: /etc/passwd | sort -d | uniq > newfile`
- C. `cut -f1 -d: /etc/passwd | sort -a | uniq | newfile`
- D. `cut -f1 -d: < /etc/passwd | sort | uniq | less < newfile`

Answer: B

Question No : 9 - (Topic 1)

Which four statements are true about the find command in Linux? (Choose four.)

- A. The user can specify how to process the files.
- B. The user can specify where to search (pathname).
- C. The user can specify what type of file to search for.
- D. The user can specify to perform logical operations on selections.
- E. The user can search and replace the contents of files with find.
- F. The user cannot find recently added files or directories on the system.

Answer: A,B,C,D

Question No : 10 - (Topic 1)

The user smith wants to display the total number of lines that are 4 characters (letters and

digits) long or more from the file1.txt file. Which regular expression or command should smith use?

- A. `egrep "^[:alnum:]{4,}$" file1.txt | wc -l`
- B. `egrep "^[:alpha:]{4,}$" file1.txt | wc -l`
- C. `egrep "^[:alpha:]{4,}$" file1.txt | wc -w`
- D. `egrep "^[:alnum:]{4,}$" file1.txt | wc -c`

Answer: A

Question No : 11 - (Topic 1)

Match the following shell special characters with their usage:

- 1) \ a) used in pairs to quote other special characters so they will not be interpreted by the shell or to embed blanks
- 2) ' ? b) variable substitution
- 3) { } ~ c) used to escape the special meaning of the next character
- 4) \$ d) wildcard file name expansion

- A. 1-c, 2-b, 3-a, 4-d
- B. 1-b, 2-d, 3-c, 4-a
- C. 1-c, 2-a, 3-d, 4-b
- D. 1-c, 2-a, 3-b, 4-d
- E. 1-d, 2-a, 3-c, 4-b
- F. 1-d, 2-c, 3, b, 4-a

Answer: C

Question No : 12 - (Topic 1)

Match the commands with their functions:

- 1. make a. installs the software to the target directory specified during configure, but typically defaults to /usr/local/subtree
- 2. configure script b. calls the compiler and linker as specified by the Makefile
- 3. make install c. creates the necessary Makefiles based on the user information

- A. 1-c, 2-a, 3-b
- B. 1-b, 2-c, 3-a
- C. 1-a, 2-c, 3-b
- D. 1-c, 2-b, 3-a

Answer: B

Question No : 13 - (Topic 1)

You have the /tools directory on a system with critical system files reserved for future use. As a Linux administrator which command would you use to protect these files from a user who might get the UID or GID as shown below?

```
[root@server1 ~]# ls -ld /tools/
```

```
drwxrwx--- 108 517 527 4096 Mar 26 20:00 /tools/
```

- A. chmod o+t /tools
- B. chmod u+s /tools
- C. chown -R 0.0 /tools
- D. chown -R nobody.nobody /tools

Answer: C

Question No : 14 - (Topic 1)

Identify the two main branches from the UNIX family tree, where the cross-pollination between these branches was responsible for making UNIX so powerful. (Choose two.)

- A. MIT
- B. GNU
- C. BSD
- D. POSIX
- E. BESYS
- F. System V

Answer: C,F

Question No : 15 - (Topic 1)

You want to access data relevant to some running processes in the system. Which directory contains the system information describing the system and processes (for example, PID files) since the system was booted?

- A. /sys
- B. /srv
- C. /proc
- D. /var/run
- E. /var/lock

Answer: D

Question No : 16 - (Topic 1)

View the Exhibit.

The root user at server1 has connected to server200 using ssh. While trying to execute remote graphical applications he receives an error as shown in the Exhibit.

What could be the possible solution to get rid of this error and run remote graphical applications safely through ssh? (Choose all that apply.)

```
[root@server1 ~]# ssh server200
root@server200's password:
Last login: Thu Apr  5 09:25:15 2007 from server1.example.com
[root@server200 ~]# nautilus .

(nautilus:10654): Gtk-WARNING **: cannot open display:
[root@server200 ~]# system-config-packages
Unable to import gtk module. This may be due to running without
$DISPLAY set. Exception was:
could not open display
[root@server200 ~]#
```

- A. Use the -X option with ssh while connecting.
- B. Remove the ~/.Xauthority file on both server1 and server200.
- C. Set the XAuthLocation parameter correctly in /etc/ssh/ssh_config.
- D. Set the X11Forwarding parameter to yes in /etc/ssh/sshd_config.

Answer: A,D

Question No : 17 - (Topic 1)

Which command would help you identify and count how many lines have the letter "w" and the letters (together) in the words.txt file?

- A. `grep 'w' 'is' words.txt | wc -l`
- B. `grep w words.txt | grep is | wc -l`
- C. `grep w words.txt | grep is | wc -c`
- D. `grep '\.w' '\.is' words.txt | wc -l`

Answer: B

Question No : 18 - (Topic 1)

Multiple users can share a UNIX machine. This is made possible by the OS by using one user's idle time to service other users. What is this feature of an operating system identified as?

- A. data sharing
- B. time sharing
- C. one-time initialization
- D. light weight kernel threading
- E. interrupt driven process handling

Answer: B

Question No : 19 - (Topic 1)

User scott issued the following command at the bash prompt:

```
[scott@station1 ~]$read -t15 -n10 -s DAX
```

What is the purpose of issuing this command?

- A. to make the read statement provide 15 seconds to enter up to 10 characters silently (no echo to terminal) into the \$DAX variable
- B. to make the read statement provide 15 seconds to enter a minimum of 10 characters echoing onto the terminal
- C. to make the read statement provide 15 seconds to enter a minimum of 10 characters without echoing onto the terminal

D. to make the read statement provide 15 seconds to enter up to 10 characters, echoing onto to terminal, into the \$DAX variable

Answer: A

Question No : 20 - (Topic 1)

Match the following signal values with their description.

1. 9 a. Hangup
- 2 . 19 b. Terminate the process and dump core
3. 11 c. Kill signal
4. 1 d. Stop the process

- A. 1-c, 2-b, 3-a,4-b
- B. 1-c, 2-d, 3-b, 4-a
- C. 1-d, 2-b, 3-c, 4-a
- D. 1-d, 2-a, 3-c, 4-b

Answer: B

Question No : 21 - (Topic 1)

Note the command given below:

```
ls -l | grep hello\gif
```

Which statement is true about this command?

- A. It will long-list the file hello.gif.
- B. It will return an error because an escape character \ is used.
- C. It will long-list the files in the hello*gif format from the current working directory.
- D. It will long-list the hello.gif, hello-gif files or any file in the hello? gif format.

Answer: D

Question No : 22 - (Topic 1)

Identify the two true statements about FTP servers. (Choose two.)

- A. FTP servers typically listen on port 21.
- B. FTP servers typically listen on port 20.
- C. FTP servers send data to clients on port 21.
- D. FTP servers send data to clients on port 20.
- E. FTP servers do not provide anonymous login by default.

Answer: A,D

Question No : 23 - (Topic 1)

A new user smith wants to customize the bourne shell by creating a new alias for the ls -l command. He wants to make the new alias persistent across logouts and also reboots. What could be done to make the new alias persistent only for smith?

- A. Add the new alias to ~/.bashrc.
- B. Add the new alias to ~/.profile.
- C. Add the new alias to /etc/profile.
- D. Add the new alias to ~/bash_profile.

Answer: B

Question No : 24 - (Topic 1)

The user scott tries to create a directory hierarchy and encounters the following error:

```
[scott@server1 tmp]$ mkdir test/test1/stored/all
```

```
mkdir: cannot create directory `test/test1/stored/all`: No such file or directory
```

```
[scott@server1 tmp]$ pwd
```

```
/tmp
```

Which two commands can the user scott use to create the directory hierarchy successfully? (Choose two.)

- A. mkdir /test/test1/stored/all

- B. mkdir -p test/test1/stored/all
- C. mkdir -r test/test1/stored/all
- D. mkdirhier /test/test1/stored/all
- E. mkdir -r /tmp/test/test1/stored/all
- F. mkdirhier /tmp/test/test1/stored/all

Answer: B,F

Question No : 25 - (Topic 1)

Examine the following output:

```
[root@station1]ps -f  
  
UID PID PPID C STIME TTY TIME CMD  
root 3944 3820 1 03:32 tty1 01:57 -bash  
root 3984 3944 0 03:32 tty1 01:57 ksh  
root 3985 3984 0 03:32 tty1 01:57 ps -f
```

Which columns would you analyze to find the most recently invoked shell?

- A. Analyze only the PID.
- B. Analyze only the UID.
- C. Analyze only the PPID.
- D. Analyze both the UID and PID.
- E. Analyze both the PID and PPID.
- F. Analyze both the UID and PPID.

Answer: E

Question No : 26 - (Topic 1)

As root you have changed the default login shell to one of the shells listed in /etc/shells file. Which file entry is modified as a result of this?

- A. /etc/shadow
- B. /etc/shells
- C. /etc/passwd

D. /etc/default/useradd

Answer: C

Question No : 27 - (Topic 1)

View the Exhibit.

The shell script is executed using the default shell interpreter with the input as w. What will be the output of the script based on this input?

```
echo " Enter your option (who,date,ls)"
read input
case "$input" in
  who ) echo " Finding the currently logged in users..., The following is the
        list"
        who
        ;;
  date ) echo " Printing todays date and current time "
        date
        ;;
  ls ) echo " Running the ls command..."
        ls
        ;;
  * ) echo " You have entered an invalid choice, Plz enter either who, date
        or ls "
        ;;
esac
exit 0
```

- A. It will print the current date and time.
- B. It will list all the currently logged in users.
- C. It will show that the input is not a valid option.
- D. It will print the currently logged in users, current date, and time.
- E. It will not show any result because the case block is terminated with an esac.

Answer: C

Question No : 28 - (Topic 1)

Which command gives the following output?

Date 03/12/2007, Time 12:00:01 AM

- A. echo "Date date +%x , Time date +%r "
- B. echo "Date `date +%x` , Time `date +%r` "

- C. echo "Date `date +%r` , Time `date +%x` "
- D. echo "Date `time +%x` , Time `time +%r` "

Answer: B

Question No : 29 - (Topic 1)

Which three statements are true about screen? (Choose three.)

- A. screen has the ability to lock a terminal.
- B. screen has the ability to monitor a session.
- C. screen windows do not adhere to vt100 standards.
- D. All windows in a screen are dependent on each other.
- E. Each window in a screen has its own scroll-back buffer.

Answer: A,B,E

Question No : 30 - (Topic 1)

Which statements are true about the File Extensions? (Choose all that apply.)

- A. File extensions are just part of the file name.
- B. File extensions are cared by all applications.
- C. File content depends upon the file extensions.
- D. File extensions do not always say what the file is.
- E. File extensions have no special meaning to the kernel.

Answer: A,D,E

Question No : 31 - (Topic 1)

As root user you have set the environment variable HISTIGNORE="ls:man:pwd:cat" with the other history-related shell variables at their default. What impact does it have on shell history?

- A. History will ignore only the commands listed in the HISTIGNORE variable.
- B. History will save only the first occurrence of the commands listed in the HISTIGNORE variable.
- C. History will ignore only the commands, issued with any valid switch, listed in the

HISTIGNORE variable.

D. History will save only the first occurrence of the commands, issued with any valid switch, listed in the HISTIGNORE variable.

Answer: A

Question No : 32 - (Topic 1)

View the Exhibit.

The user smith needs to display the MAC address only of eth0.

Which command gives the desired output?

```
eth0      Link encap:Ethernet  HWaddr 00:0C:29:E7:FC:93
          inet addr:192.168.0.100  Bcast:192.168.0.255  Mask:255.255.255.0
          inet6 addr: fe80::20c:29ff:fee7:fc93/64 Scope:Link
          UP BROADCAST RUNNING MULTICAST  MTU:1500  Metric:1
          RX packets:35689  errors:1  dropped:1  overruns:0  frame:0
          TX packets:9  errors:0  dropped:0  overruns:0  carrier:0
          collisions:0  txqueuelen:1000
          RX bytes:4031285 (3.8 MiB)  TX bytes:546 (546.0 b)
          Interrupt:177  Base address:0x1400
```

- A. `ifconfig eth0 | awk '/eth0/ {print $0}'`
- B. `./sbin/ifconfig eth0 | awk '/HW/ {print $4}'`
- C. `./sbin/ifconfig eth0 | awk '/HW/ {print $5}'`
- D. `./sbin/ifconfig eth0 | awk '/eth0/ {print $4}'`

Answer: C

Question No : 33 - (Topic 1)

View the Exhibit and note the permissions and ownerships of the /sysdir directory.

What could be done to let the user scott write to and copy files from the directory without listing others files and without compromising the security of the directory?

```
[scott@server1 ~]$ ll /sysdir
ll: /sysdir : Permission denied
[scott@server1 ~]$ ll -d /sysdir/
d-wx-----  2 root  admins 4096 Mar 25 23:08 /sysdir
[scott@server1 ~]$ groups
scott apps
[scott@server1 ~]$
```

- A. Add rwx to others permissions of the /sysdir directory.
- B. Add scott as a member of the admins group and set permissions to 700 on the /sysdir directory.
- C. Add scott as a member of the admins group and set the group permissions wx for the /sysdir directory.
- D. Add scott as a member of the admins group and set the group permissions rx for the /sysdir directory.

Answer: C

Question No : 34 - (Topic 1)

The user smith has logged in to the system and his current working directory is /tmp. Which command changes the user current working. Which command changes the user's current working directory to the user's home directory? (Choose all that apply.)

- A. cd
- B. cd ..
- C. cd ~
- D. cd ../~
- E. cd /home
- F. cd \$HOME

Answer: A,C,F

Question No : 35 - (Topic 1)

The user smith executes the following command:

```
awk -F: '/bash$/ {nlines++; print $1;} END {print "\n", nlines}' /etc/passwd.
```

What could be the purpose of using this command?

- A. to print all lines in /etc/passwd that ends with bash
- B. to print the name of all normal users in /etc/passwd
- C. to print and count the names of the users who use the bash shell
- D. to print the total number of lines in /etc/passwd that ends with bash

Answer: C

Question No : 36 - (Topic 1)

You want to customize the default background color in an X window system using command-line options. What would you do to achieve this task?

- A. Edit the ~/.xinitrc file.
- B. Edit the ~/.Xdefaults file.
- C. Edit the ~/.Xresources file.
- D. Edit the ~/.Xauthority file.

Answer: B

Question No : 37 - (Topic 1)

A printer has been configured on a Linux box in a heterogeneous network using CUPS. A user sends a print job from a WINDOWS machine. Identify the statement that holds true in this scenario.

- A. The user will not able to print because he/she is on a non-UNIX system.
- B. The user will not able to print because the printer is configured using CUPS.
- C. The user will be able to print because the printer follows the IPP standard.
- D. The user will not be able to print because WINDOWS does not support CUPS by default.

Answer: C

Question No : 38 - (Topic 1)

smith is trying to send a message to the local user bob using the write command and he receives an error as shown below:

```
[smith@station2 ~]$write bob
```

```
Write: bob has messages disabled
```

```
[smith@station2 ~]$
```

What could be done to overcome the error?

- A. bob should set the logged in terminal to the tty group.
- B. bob should enable talk and ntalk on his system.
- C. bob should accept messages using the mesg y command.
- D. smith should indicate the terminal on which bob is logged in.

Answer: C

Question No : 39 - (Topic 1)

User smith on station2 is trying to chat with the remote user bob on station1 using the talk command. smith receives an error message as shown below:

```
[smith@station2 ~]$talk bob@station1.example.com
```

```
[No connection yet]
```

```
[ Error on read from talk daemon: Connection refused ]
```

```
[smith@station2 ~]$
```

What can the root user do to resolve the issue? (Choose two.)

- A. let smith retry talk by reading from STDIN and sending to bob
- B. let smith retry talk after changing the group of talk command to tty
- C. let smith retry the talk request with UDP port 518 open on both systems
- D. let smith retry talk after restarting the xinetd service with ntalk enabled on both systems
- E. let smith retry talk after restarting the network service with the UDP port 517 blocked on both systems

Answer: C,D

Question No : 40 - (Topic 1)

What are the improvements of vim over vi? (Choose all that apply.)

- A. multi-level undo
- B. online help system
- C. command-line completion
- D. multiple windows and buffers
- E. supports using arrow keys in command mode
- F. search and replace operations in command mode

Answer: A,B,C,D

Question No : 41 - (Topic 1)

Match the following file redirection operators with their functions:

- 1) < a) redirects STDOUT to a file (overwrite)
- 2) > b) redirects STDIN from a file
- 3) >> c) redirects both STDOUT and STDERR
- 4) 2> d) redirects STDOUT to a file (append)
- 5) 2>> e) redirects STDERR to a file (overwrite)
- 6) &> f) redirects STDERR to a file (append)
- 7) 2>&1 g) redirects both STDOUT and STDERR

- A. 1-b, 2-a, 3-d, 4-e, 5-f, 6-c, 7-g
- B. 1-b, 2-e, 3-f, 4-a, 5-d, 6-g, 7-c
- C. 1-c, 2-e, 3-f, 4-a, 5-d, 6-b, 7-g
- D. 1-c, 2-a, 3-d, 4-f, 5-e, 6-g, 7-b
- E. 1-b, 2-a, 3-d, 4-f, 5-e, 6-c, 7-g
- F. 1-b, 2-e, 3-d, 4-a, 5-f, 6-c, 7-g

Answer: A

Question No : 42 - (Topic 1)

The /data directory that belongs to the apps group is set with 1770 permissions. The details of the apps group members are given below.

```
# groups smith bob scott
```

```
smith : smith apps
```

```
scott : scott apps
```

```
bob : bob apps
```

What are the effective permissions for each of these users on other users' files and directories in the /data directory?

- A. Read, write, and execute permissions on files and directories.
- B. Read permission on files and read and execute permissions on directories.
- C. Read and write permissions on files and read, write, and execute permissions on directories.
- D. Read permissions only because full permission is set to the owner of the files and directories only.

Answer: B

Question No : 43 - (Topic 1)

As root you have issued the following command :

```
[root@station2]# rpmbuild --rebuild sendmail-8.12.8-9.80.src.rpm
```

What does the rpmbuild command do? (Choose two.)

- A. It builds the sendmail source package.
- B. It only installs the binary software produced from the sendmail source package.
- C. It only compiles the binary software produced from the sendmail source package.
- D. It does both the compilation and installation of the binary software produced from the sendmail source package.

Answer: A,D

Question No : 44 - (Topic 1)

You want to check any particular user is consuming a large amount of CPU. Which command would you use to check the CPU used by a user?

- A. w
- B. who
- C. free
- D. users
- E. finger

Answer: A

Question No : 45 - (Topic 1)

You have issued the following command:

```
mkdir -p test/a{dax,connor,bryan}g/vo{in,out,tmp}
```

Which of the following directories will it create? (Choose all that apply.)

- A. test/voin/adaxg
- B. test/adaxg/voout
- C. test/aconnorg/voin
- D. test/adaxnnorg/voinout
- E. test/aconnoyang/vointmp

Answer: B,C

Question No : 46 - (Topic 1)

The root user on your system has issued the `ln -s file1.txt file2.txt` command. Which two statements are true? (Choose two.)

- A. file2.txt will have 777 permissions.
- B. file1.txt will be symbolically linked to file2.txt.
- C. file2.txt will be symbolically linked to file1.txt.
- D. file2.txt and file1.txt will have the same inode number.
- E. file2.txt and file1.txt should exist on the same file system.

Answer: A,C

Question No : 47 - (Topic 1)

View the Exhibit and note the directory hierarchy. How would you delete the /test1 directory hierarchy? (Choose all that apply.)

```
[root@server1 ~]# ll -R /test1
/test1/:
total 8
drwxr-xr-x  3  root root 4096 Mar 13 06:38 hello

/test1/hello:
total 8
drwxr-xr-x  3  root root 4096 Mar 13 06:38 fine

/test1/hello/fine:
total 8
drwxr-xr-x  2  root root 4096 Mar 13 06:38 documents
/test1/hello/fine/documents:
total 0
[root@server1 ~]#
```

- A. `rm -rf /test1`
- B. `rmdir -r /test1`
- C. `rmdir -p /test1`
- D. `rm -d /test1/hello/fine/documents`
- E. `rm -rf /test1/hello/fine/documents`
- F. `rmdir -p /test1/hello/fine/documents`

Answer: A,F

Question No : 48 - (Topic 1)

What would be the default permissions on files and directories created by a user with `umask 027`?

- A. Files will have 640 permissions and directories will have 750 permissions.
- B. Files will have 639 permissions and directories will have 750 permissions.
- C. Files and directories will have 000 permissions because 027 is not a valid umask.
- D. Files and directories will have default permissions as of the default umask because 027

is not a valid umask.

E. Files will have 666 permissions and directories will have 777 permissions because 027 is not a valid umask.

Answer: A

Question No : 49 - (Topic 1)

Observe the following while loop:

```
while true
do
echo " Welcome"
sleep 5
done
```

What does the while statement do in the script when the condition is true?

- A. It executes the echo command 5 times with a sleep time of 5 minutes.
- B. It executes the echo command infinitely with a sleep time of 5 minutes.
- C. It executes the echo command 5 times with a sleep time of 5 seconds.
- D. It executes the echo command infinitely with a sleep time of 5 seconds.

Answer: D

Question No : 50 - (Topic 1)

Which command is used for compilation when installing software from the source code?

- A. make
- B. install
- C. ./configure
- D. make install

Answer: A

Question No : 51 - (Topic 1)

The user smith has issued the command:

```
cut -f1,3 -d: /etc/passwd | tr a-z A-Z > file1.txt
```

What could be the purpose of using this command?

- A. to map the username, UID, GID on the system in uppercase to file1.txt
- B. to map the username along with UIDs on the system in uppercase to file1.txt
- C. to map the username, UID, passwords on the system in lowercase to file1.txt
- D. to map the username along with passwords on the system in uppercase to file1.txt

Answer: B

Question No : 52 - (Topic 1)

What is the minimum number of disk partitions required to have a successful Linux installation?

- A. 2 (two)
- B. 4 (four)
- C. 1 (one)
- D. 3 (three)

Answer: C

Question No : 53 - (Topic 1)

Which statements are true about a process? (Choose all that apply.)

- A. It is associated with a nice value.
- B. It is associated with a Process ID (PID).
- C. It does not inherit the environment from the parent process that spawns it.
- D. It uses only RAM irrespective of the amount of memory available in the system.
- E. Each process will normally be associated with the UID and GID of the user that launched the program.

Answer: A,B,E

Question No : 54 - (Topic 1)

Identify the program that runs with the real and effective UID and GID of the switched user when you switch from one user to another using su command.

- A. a logout script
- B. the id command
- C. an interactive shell
- D. the login command
- E. the chroot command

Answer: C

Question No : 55 - (Topic 1)

You are planning to add the new printer1 print queue and also want to make it the default print queue. Which of the following two commands would help you achieve the task? (Choose two.)

- A. lpadmin -d printer1.
- B. lpadmin -x printer1.
- C. lpadmin -p printer1 -E parallel:/dev/lp0.
- D. lpadmin -p printer1 -E -v parallel:/dev/lp0.

Answer: A,D

Question No : 56 - (Topic 1)

Match the following Linux kernel virtual hierarchies with their content:

- 1) /proc a) Per process information directories and other tunables
- 2) /sys b) RAM drive for POSIX shared memory operations
- 3) /dev/pts c) Kernel object data structures
- 4) /dev/shm d) Auto-ownership of terminals (ttys)

- A. 1-a, 2-c, 3-d, 4-b
- B. 1-b, 2-a, 3-d, 4-c
- C. 1-a, 2-b, 3-d, 4-c
- D. 1-b, 2-a, 3-c, 4-d

Answer: A

Question No : 57 - (Topic 1)

What would be the output of the nested for loop given below?

```
for (( i=1; i<=5; i++))
```

```
do
```

```
for (( j=1; j<=5; j++))
```

```
do
```

```
echo -n "$i"
```

```
done
```

```
echo #####
```

```
done
```

- A.** 1 1 1 1 12 2 2 2 23 3 3 3 34 4 4 4 45 5 5 5 5
- B.** 1 2 3 4 51 2 3 4 51 2 3 4 51 2 3 4 51 2 3 4 5
- C.** 5 4 3 2 15 4 3 2 15 4 3 2 15 4 3 2 15 4 3 2 1
- D.** 5 5 5 5 54 4 4 4 43 3 3 3 32 2 2 2 21 1 1 1 1

Answer: A

Question No : 58 - (Topic 1)

Which statement is true about a normal user created with UID less than 500?

- A.** The user will not have an interactive login shell.
- B.** The user will have the privilege to mount and unmount file systems.
- C.** The user account can be used only for system service-related tasks.
- D.** The user will have all normal user features like home directory, shell, and so on, by default.
- E.** The user will be restricted from logging in to the system because the UID < 500 is reserved for system users or pseudo accounts.

Answer: D

Question No : 59 - (Topic 1)

You want to archive a directory and its subdirectories (excluding a list of subdirectories from a file) using the tar command. Which option would help you to do this?

- A. -F
- B. -X
- C. -C
- D. --exclude

Answer: B

Question No : 60 - (Topic 1)

View the Exhibit.

What is the output of the shell script when executed at the bash shell?

```
for (( i=1; i<=4; i++ ))
do
  for (( j=1; j<=i; j++ ))
  do
    echo -n "$i"
  done
  echo ""
done
```

- A. 1223334444
- B. 1121231234
- C. 4444333221
- D. 1234123121

Answer: A

Question No : 61 - (Topic 1)

As a root user you execute the commands as shown below:

```
[root@station1]# a=$((10 % 4 + 6 * 2))
```

```
[root@station1]# echo $a
```

What would be the output of the echo statement?

- A. 2
- B. 12
- C. 14
- D. 10

Answer: C

Question No : 62 - (Topic 1)

You executed the following command to verify the integrity of sendmail:

```
[root@station1 ~]# rpm -Va sendmail
```

```
.....T. c /etc/mail/sendmail.cf
```

```
S.5....T. c /var/log/mail/statistics
```

```
[root@station1 ~]#
```

What do infer about the /var/log/mail/statistics file from the output?

- A. The permissions, user ownership, and file type have changed.
- B. The permissions, group ownership and file type have changed.
- C. The user ownership, group ownership and file type have changed.
- D. The MD5 signature, file size, and modification time have changed.

Answer: D

Question No : 63 - (Topic 1)

You have the copy of all the rpms in the /RPMS directory on your local Linux machine. After logging in as root and changing to the /RPMS directory, you try to install the mysql

package using the rpm command. You end up with an error message as shown below:

Error: Failed dependencies: Perl(DBI) is needed by mysql.

How would you overcome this error and install mysql successfully by resolving the dependencies?

- A. by installing the software using rpm with the -F option
- B. by installing the software using rpm with the --aid option
- C. by installing the software using rpm with the --force option
- D. by installing the software using rpm with the --nodeps option

Answer: B

Question No : 64 - (Topic 1)

View the Exhibit.

As bob you have logged in at the tty1 terminal and run the commands as shown in the Exhibit. You want to list the background jobs in the current terminal and issue the jobs command.

Which statement is true in this context?

```
[bob@station2 ~]$ man top&
[1] 4805
[bob@station2 ~]$ man nice&
[1]+ Stopped man top
[2] 4810
[smith@station2 ~]$man renice&
[3] 4815
[2]+ Stopped man nice

[bob@station2 ~]$jobs
[1] Stopped man top
[2]- Stopped man nice
[3]+ Stopped man renice
[bob@station2 ~]$
```

- A. The plus sign indicates the previous job.
- B. The plus sign indicates the last stopped job.
- C. Only the job with a minus sign can be made to run in the foreground again.

D. Only the job with a plus sign can be made to run in the foreground again.

Answer: B

Question No : 65 - (Topic 1)

You have opened three terminals and the Firefox browser at Graphical User Interface (GUI). How can you ensure that the same applications and windows start on your next login to GUI?

- A. While logging out, save the settings in the ~/.Xresources file.
- B. While logging out, use the hot key, [Control] + [Alt] + [Backspace].
- C. While logging out, use the kill command with signal 12 to kill gdm-binary.
- D. While logging out by selection, log out from the action menu. Click the save current setup option.

Answer: D

Question No : 66 - (Topic 1)

The user smith, whose primary group is smith, would like to create a file in his home directory, which belongs to the group apps.

Which two statements are correct? (Choose two.)

- A. SGID should be set on the destination directory to let users create files that belong to the group other than their primary group.
- B. The user smith could create a file that belongs to the apps group only if his private group is the apps group as per /etc/group.
- C. The user smith could use the newgrp command to log in to the apps group and his private group will be changed to apps group for a particular session if his name is listed in /etc/group as a member of apps group.
- D. The user smith could use the newgrp command to log in to the apps group, but a password is required to change his private group to apps group for a particular session if his name is not listed in /etc/group as a member of apps group.

Answer: C,D

Question No : 67 - (Topic 1)

Which system help facility gives the help page exactly as using -k switch with man?

- A. info
- B. whatis
- C. apropos
- D. --help option with the command

Answer: C

Question No : 68 - (Topic 1)

Where do the manual (man) pages for all commands reside in the File System Hierarchy (FSH)?

- A. /usr/share/man
- B. /usr/share/info/man
- C. /usr/man/share/locale
- D. /usr/share/locale/man

Answer: A

Question No : 69 - (Topic 1)

Match the mpage options with their functionalities.

- 1. mpage -r a. toggle printing on both sides of the paper (duplex mode)
- 2. mpage -t b. print in landscape mode instead of the default portrait
- 3. mpage -l c. reverse the order in which the pages are printed

- A. 1-c, 2-a, 3-b
- B. 1-b, 2-c, 3-a
- C. 1-c, 2-b, 3-a
- D. 1-b, 2-a, 3-c

Answer: A

Question No : 70 - (Topic 1)

What are the extra features that the Bourne Again Shell (bash) has compared to the Bourne Shell (sh)? (Choose all that apply.)

- A. background exit status
- B. read values from the terminal
- C. combine STDOUT and STDERR
- D. file name completion and command history
- E. allows functions and variables with the same name
- F. expansion of positional parameters beyond \$9 with \${num}

Answer: D,E,F

Question No : 71 - (Topic 1)

Match the following arguments with their actions when used with the find command:

- 1) -print a) Allows a command to be run against each matching file
- 2) -ls b) Is the default action and displays matches
- 3) -exec c) Displays full details on matches
- 4) -ok d) Can be used when you want a confirmation prompt

- A. 1-b, 2-c, 3-a, 4-d
- B. 1-b, 2-a, 3-d, 4-c
- C. 1-c, 2-a, 3-b, 4-d
- D. 1-c, 2-d, 3-a, 4-b

Answer: A

Question No : 72 - (Topic 1)

Which statement is true about the privileges granted to a user with the UID of 0?

- A. The system ignores privileges to modify software installed on the system.
- B. Privileges are granted as per the permissions set on every file and device known to the system.
- C. Privileges are granted only to read most of the configuration files and documentation files in the system directories, not modify them.
- D. The system ignores all permissions when responding to commands from the user and provides read and write permissions to every file and device known to the system.
