Vendor: Microsoft

Exam Code: 70-235

Exam Name: Developing Business Process and
Integration Solutions Using Microsoft BizTalk Server

Version: DEMO

1: Your company uses a BizTalk orchestration named POProcess to process purchase order requests from a trading partner. You create and deploy a Business Activity Monitoring (BAM) view to monitor the amount of time it takes to respond to requests. The BAM view contains an associated activity definition named POProcessView.xml. You need to import and link the BAM definition file to the POProcess event source. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)
A.In the Health and activity Tracking tool, configure message tracking for the orchestration.
B.In Tracking Profile Editor (TPE), import the BAM activity definition.
C.In TPE, import the POProcess activity and drag the event source shapes to the Key Performance Indicators.
D.In the BizTalk Server 2006 Administration console, configure message tracking for the host instance.
Correct Answers: B C

2: Your company uses Business Activity Monitoring (BAM) to monitor the amount of time spent on a review. BAM contains a view that aggregates the time by location and per EmployeeID. You need to use the Key Performance Indicators (KPIs) best suited for a Dimension Data aggregation type. Which two KPIs should you use? (Each correct answer presents a complete solution. Choose two.)
A.Review Started
B.Review Completed
C.Review EmployeeID
D.Review Location
Correct Answers: A B

3: Your company wants to use a Business Activity Monitoring (BAM) view in the BAM Portal Web site to share real-time results with its trading partners. The current view named OrderProcurement includes an associated activity definition. You notice that the view does not appear in the BAM Portal Web site. The BAM Portal Web site is configured with default settings. You need to ensure that the OrderProcurement view appears in the BAM Portal Web site. What should you do?
A.Run the BM tool and deploy the OrderProcurement activity definition.
B.Run the Tracking Profile Editor tool to deploy the BizTalk Tracking Tool file for the OrderProcurement activity definition link.
C.On the OrderProcurement.xls file, click the BAM menu and click Export to Xml.
D.Run the BizTalk Configuration tool to reconfigure the BAM Portal Web site and the BAM database.
Correct Answers: A

4: Your company wants to monitor customer data pertaining to shoe sales.
You enter Customer Name,Age,and Gender in a Business Activity Monitoring(BAM) view named SeasonalShoeSales.xls. This BAM view contains a pivot table.
You need to create an activity definition definition that allows you to link the BAM view to an activity named ShoeSale.

What should you do?

To answer,move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Correct Answers: See Full Version

5: Your companys BizTalk solution contains a Business Activity Monitoring (BAM) activity named BAM_ContosoRegionalSales_livedata.xls. This activity contains a BAM view named ContosoRegionalSales. The activity is also linked to a BizTalk orchestration, and it monitors real-time aggregated (RTA) regional sales data. You open the Health and Activity Tracking tool and see successful completion details and other tracking data. However, the regional sales data in BAM is blank. You need to ensure that the BizTalk orchestration is being tracked by BAM. What should you do?

A.Run the BAM Manager (BM.exe) to stamp BAM_ContosoRegionalSales_livedata.xls with the connection string to the BAM database.

B.Turn on the Tracking Subservice while you use the default BizTalk Host.

C.Run the BizTalk Tracking Tool (BTT.exe) to deploy the BAM tracking profile.

D.Run the BAM database DTS package to calculate aggregations.

Correct Answers: C

6: Your company hosts two BizTalk orchestrations named POProcess and POCreditProcess. You use Business Activity Monitoring (BAM) to create an activity definition file named POCreditCycle. The file contains activities for both orchestrations; each orchestration is identified by using a PONumber. You need to link the activities to both orchestrations so that the BAM view records POProcess before POCreditProcess. What should you do first?

A.Create a relationship folder for both orchestrations and the activities by using the PONumber.

B.Use BizTalk Tracking continuation to create a relationship between the orchestrations and the activities.

C.Import the activity definition file and link the orchestrations and shapes to the activity items.

D.Create a relationship folder for both orchestrations and the activities by using the default value for ActivityID.

Correct Answers: B

7: Your company uses a BizTalk orchestration named ProjectCycleProcess to track project development phases.

A Business Activity Monitoring (BAM) view named ProjectCycleView monitors average phase cycles of project. The BAM view has a deployed activity definition named ProjectCycle.xml and a deployed tracking file named ProjectCycleTracking.btt.

You need to update the currently deployed BAM view with a new definition file. You also need to apply the BAM tracking profile.

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

List of Actions	Answer Area
Remove the current BAM tracking profile.	
In the BM tool, remove ProjectCycleView.	
In the BM tool, update ProjectCycleView.	
In the Tracking Profile Editor, open ProjectCycleTracking.btt, associate the Key Performance Indicators, and then apply.	
In the BM tool, deploy ProjectCycleView.	

Correct Answers: See Full Version

8: Your company uses Microsoft SQL Server Analysis services to aggregate values inside a Business Activity Monitoring (BAM) activity named ContosoOrderProcurement. This activity contains an aggregated BAM view named ContosoNorthAmericaView, which is not in real time. When you open this view, you notice that the data does not contain the current aggregated values. You need to view the current aggregation values in the BAM view. What should you do?

A.Run the BAM database DTS package named BAM_AN_ContosoNorthAmericaView and refresh the view.

B.Configure the view to use real-time aggregation.

C.Click Refresh in the BAM view.

D.Define and refresh the view in the SQL Analysis services.

Correct Answers: A

9: You create an atomic transaction to read data from an external database. The processing time for the transaction may take several minutes.   You need to ensure that the data in the source database has not changed at the time the transaction is committed.   What should you do?

A.Set the transaction time-out to Zero.

B.Set the Isolation Level property to Repeatable Read.

C.Set the Isolation Level property to Read Committed.

D.Set the Transaction Type property to Long running.

Correct Answers: B

10: You create an orchestration to communicate with a Web service that requires credentials. You also create a Web service port with default settings.   When you use the port, you discover that messages are not sent.   What should you do?

A.Set the AuthenticationScheme parameter to match the Username and Password of the Web service.

B.In Internet Information Services, disable the Anonymous Access parameter for the Web service.

C.Set the ProxyUsername and ProxyPassword parameters to match the Username and Password of the Web service.

D.Set the UseSSO parameter to True.

Correct Answers: A
