

Vendor: Microsoft

Exam Code: 70-577

Exam Name: TS: Microsoft Windows Embedded Standard
2009, Development

Version: DEMO

1: You are creating a Windows Embedded Standard run-time image.

You need to identify the file system component that meets the following requirements:

Set access level to files and folders for each user level.

Allow transparent encryption of files and directories for users and programs.

Which component should you use?

- A.NTFS file system (NTFS)
- B.File Allocation Table (FAT)
- C.Compact Disc File System (CDFS)
- D.Universal Disk File System (UDFS)

Correct Answers: A

2: You are developing a Windows Embedded Standard device that contains multiple user accounts.

You add the required number of User Account components.

You need to configure the User Account components to meet the following requirements:

Users must be able to modify the system settings.

Users must be unable to install programs that affect the system files.

Which User Type should you set?

- A.Guest
- B.User
- C.Power User
- D.Administrator

Correct Answers: C

3: You are creating a Windows Embedded Standard run-time image. You need to create multiple user accounts. What should you do?

- A.Add multiple instances of the User Account component to the SLX file.
- B.Add the Administrator Account component to multiple SLX files.
- C.Use Component Designer to create a component that includes a custom security template (.inf) file.
- D.Add the User Account component to multiple SLX files.

Correct Answers: A

4: You are developing a Windows Embedded Standard device that you plan to sell in France and Canada.

You need to modify the settings for the component to meet the following requirements:

Uses the French Language Support component.

Uses a minimal footprint for the French Language Support component.

User interface supports only French and English.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A.Disable the Include multilanguage user interface resources option.
- B.Disable the Support all system locales for French option.
- C.Enable the Include multilanguage user interface resources option.
- D.Enable the Support all system locales for French option.

Correct Answers: B C

5: You are developing a Windows Embedded Standard device that you plan to sell in Russia.

You need to ensure that the device meets the following requirements:

- Supports the Russian language.

- Supports the Russian language for the user interface.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A.Enable the Include multilanguage user interface resources option in the component.

B.Enable the Support all system locales for Russian option in the component.

C.Add the User Locale: Russian component to the configuration of the operating system image.

D.Add the Russian Language Support component to the configuration of the operating system image.

E.Add the Language: Russian-0419 component to the configuration of the operating system image.

Correct Answers: A D

6: You are designing a custom shell component for Windows Embedded Standard. You need to ensure that this component is displayed along with other existing shells in the component browser.
