Vendor: Cisco

Exam Code: 700-301

Exam Name: Advanced Borderless Network Architecture
Sales Exam

Version: DEMO

QUESTION 1
Which Cisco solution can assist with the adoption of 802.11n by solving problems that are related to the combination of 802.11a/g and 802.11?
Select exactly 1 answer(s) from the following:

A. Cisco ClientLink
B. Cisco Medianet
C. Cisco TrustSec
D. Cisco Telepresence

Answer: A

QUESTION 2
You need to easily manage the security risks of borderless networks. Which mobility solution uses next-generation remote-access technology to allow users to securely access the network with their device of choice? Select exactly 1 answer(s) from the following:

A. Cisco Medianet
B. Cisco TrustSec
C. Cisco Virtual Security Gateway
D. Cisco AnyConnect

Answer: D

QUESTION 3
Which Cisco Borderless Network solution is equipped with a discovery mechanism that provides the ability to gain visibility into the network and applications that it supports? Select exactly 1 answer(s) from the following:

A. Cisco Integrated Services Router
B. Application Velocity
C. Cisco EnergyWise Orchestrator
D. Cisco Medianet

Answer: B
Explanation:
The first component of Application Velocity is the ability to gain visibility into the network and the applications that it supports.

QUESTION 3
Which Cisco Borderless Network solution helps to secure network access through policy- based control?

A. Cisco TrustSec
B. Cisco Medianet
C. Cisco AnyConnect
D. Cisco Virtual Security Gateway

Answer: A

QUESTION 4
What are the four key pillars of the Cisco Secure Borderless Network that provide a simple, secure, and reliable experience for the user?
Select exactly 1 answer(s) from the following:

A. Internet, endpoint, firewall, and data center
B. Internet, firewall, data center, and policy
C. policy, firewall, data center, and endpoint
D. Internet, endpoint, data center, and policy

Answer: D
Explanation:
Cisco's security strategy has 4 pillars:
The End Zone
The Internet Edge
The Data Center, and
Policy

QUESTION 5
Which of the following collects and analyzes the radio information that is sent by the access points, building a comprehensive view of the wireless environment, and automatically takes action to avoid interference or gaps in coverage?

A. Wi-Fi Location System
B. Cisco Wireless Control System
C. Wi-Fi devices
D. WLAN controllers

Answer: D

QUESTION 6
You want a security solution that enforces access and policies in the borderless network by providing information such as identity, time and date, posture, location, device type, and access type. Which Cisco solution will provide you with this information?

A. Cisco Adaptive Security Appliances
B. Cisco AnyConnect
C. Cisco TrustSec
D. Cisco IronPort Web Security Appliances

Answer: C
Explanation:
http://www.cisco.com/en/US/solutions/collateral/ns170/ns896/ns1051/solution_overview_c2 2-591771.html

QUESTION 7
Which core component of the Cisco Borderless Network Architecture stops attacks before they penetrate the network perimeter by protecting resources and data, in addition to voice, video, and multimedia traffic?

A. Medianet
B. Cisco TrustSec
C. Cisco Catalyst 6500 Series
D. Cisco Adaptive Security Appliance 5500 Series

Answer: D

QUESTION 8
Which two Cisco Borderless Network solutions provide network-integrated WAN optimization and scalable application-aware acceleration to reduce bandwidth costs while delivering optimal user experience for both cloud services and locally hosted services? (Choose two.)

A. Application Velocity
B. Cisco Mobility Services
C. Cisco WAAS Express
D. Cisco EnergyWise Orchestrator

Answer: AC

QUESTION 9
What will Cisco CleanAir technology do if interference causes a jam on your Wi-Fi channel?

A. Change channels within 30 seconds to avoid the interference
B. Shut down your network
C. Restart your service
D. Automatically reconnect you on the same channel

Answer: A

QUESTION 10
Which two features are specific to the Cisco TrustSec solution? (Choose two.)

A. It uses switchport-level encryption to protect network data confidentiality.
B. It allows guests to securely have complete access to the network.
C. The information and capabilities it provides for controls, auditing, and reporting can be used to meet compliance requirements.
D. It recognizes the types of media that are going over the network and makes sure that they are properly created, sent, and delivered.
E. It is primarily used for wired connections inside of an organization to protect the most sensitive information.

Answer: CD

QUESTION 11
What are two features of the Cisco EnergyWise solution? (Choose two.)

A. It automatically controls devices on the network such as IP phones, lights, and air conditioning.
B. It works only with Cisco products.
C. It is added on to the Cisco Integrated Services Router.
D. It measures, reduces, and reports energy usage across the entire corporate infrastructure.
E. It raises operating costs but provides the opportunity for tax incentives.

Answer: AD
Explanation:
http://www.cisco.com/en/US/prod/switches/ps5718/ps10195/white_paper_c11- 514539.html

QUESTION 12
Which of the following involves studying the network at regular intervals and allowing proactive planning and designing of network modifications?

A. Baseline
B. Cisco Validated Design
C. Proof-of-concept testing
D. Business continuance

Answer: B
Explanation:
What is a Baseline?
A baseline is a process for studying the network at regular intervals to ensure that the network is working as designed. It is more than a single report detailing the health of the network at a certain point in time. By following the baseline process, you can obtain the following information:
http://www.cisco.com/en/US/tech/tk869/tk769/technologies_white_paper09186a008014fb3
b.shtml

QUESTION 13
Which of the following is a characteristic of Cisco EnergyWise?

A. It can be set to control IP-enabled building and lighting controllers.
B. It can be set to turn devices off, but it cannot yet be set to reduce power.
C. It works independently of Cisco Catalyst switches.
D. It can only be used on Cisco devices.

Answer: A

QUESTION 14
Which of the following wirelessly connects devices to the network resources and simultaneously monitors the airspace to send radio information back to the WLCs?

A. Cisco Wireless Location Appliance
B. Cisco Aironet Access Points
C. Wi-Fi devices
D. Cisco Compatible Extensions tags

Answer: B

Ensurepass.com Members Features:

1. Verified Answers researched by industry experts.
2. Q&As are downloadable in PDF and VCE format.
3. 98% success Guarantee and **Money Back** Guarantee.
4. Free updates for **180** Days.
