Topic 1, A.Datum Corporation

Overview

A Datum Corporation is a manufacturing company that has a main office in New York City, sales offices throughout the United States, and a manufacturing plant in Seattle.

A Datum has 3,000 users. One hundred and fifty users work at the main office in an administrative role, 650 users work in the sales offices, and 2,200 users work in the manufacturing plant.

Existing Environment

Current Infrastructure

A Datum runs an on-premises server farm that is lightly virtualized. All servers run Windows Server 2008 R2.

A Datum uses Microsoft Lync Server 2010, Microsoft SharePoint Server 2010, and Microsoft Exchange Server 2010. Various versions of Microsoft SQL Server are used heavily across the server farm both as an infrastructure product and as a data warehouse tool.

The server farm contains 12 servers. Six of the servers have two processors with quad cores. Six of the servers have four processors with quad cores.

Half of the servers are managed by using Microsoft System Center 2010.

Each user at the main office has a desktop computer that runs Windows 7 Professional. The computers have Microsoft Office Professional Plus 2007 installed. Each user at the sales offices has a laptop that runs Windows 7 Professional. The laptops have Office Professional Plus 2010 installed.

Windows 7 licenses were acquired when the hardware was acquired. The users in the manufacturing plant do not have access to any devices except for terminals that run a line-of-business application.

Current Licensing Solution

A Datum recently signed an Enterprise Agreement that includes Office Professional Plus, Windows Enterprise Upgrade, and Microsoft Core CAL Suite licensed per user.

Currently, all of the licenses for SQL Server are assigned to long-term workloads.

Requirements

Business Goals

A Datum spent a significant amount of time developing a custom application that will be used by hundreds of the company's partners and suppliers. The application will always run

on the latest version of SQL Server and SharePoint Server. A Datum wants the application to be available to the users immediately.

A Datum wants a cost-effective solution for the manufacturing plant users to access email and to view the company's intranet site.

Planned Changes

Currently, the server farm runs entirely on-premises.

A Datum plans to extend the server farm to the cloud and is considering completely moving some workloads to the cloud. In addition, the company plans to use hosted services for the productivity servers in the next 24 to 36 months. The company expects the existing on-premises server farm to be heavily virtualized within three months. Each server will host eight to 20 virtual machines.

A Datum wants to improve the manageability and control of the users' desktops. In the short term, the company will deploy Windows 8.1 Enterprise and Office Professional Plus 2013 internally. During the next six months, A Datum plans to implement a Virtual Desktop Infrastructure (VDI) by using Remote Desktop Services (RDS) on Windows Server 2012 R2.

In line with the VDI implementation, all of the sales office users will be issued a tablet. A Datum wants to enable the users to work from their home computer as well, as the need arises. In addition, the company plans to enable a Bring Your Own Device (BYOD) strategy.

Explanation:

Box 1: Count the total number of physical cores for each processor in the server.

Box 2: Multiply the number of cores by the core factor to calculate the number of licences.

Box 3: Divide the number of licences by two.

* SQL Server Core Based License

Enterprise: \$6874 X [# of cores] X [core factor]

* Core factor:

Processor Type	Core Factor
AMD Processors 31XX, 41XX, 42XX, 61XX, 62XX Series with 6+ cores	0.75
Single Core Processors	4
Dual-Core Processors	2
