Exam Name: Windows Server Administration Fundamentals
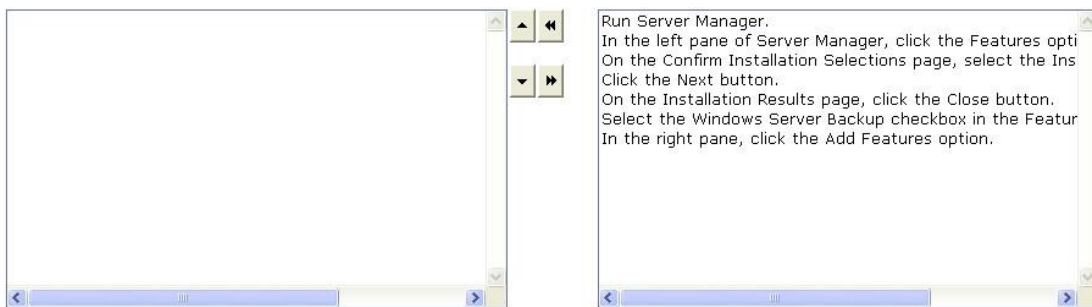

Version: Demo

QUESTION 1

A disaster recovery plan should contain data, hardware, and software that are critical for a business. Which of the following are disaster recovery planning steps? Each correct answer represents a complete solution. Choose all that apply.

A.   Prioritize business processes
B.   Monitor the plan
C.   Identify alternate sites
D.   Identify and assess the risks

Correct Answer: ACD

QUESTION 2

You work as a Server Administrator for company Inc. The company has a Windows 2008 R2 network environment. You need to install Windows Server Backup to back up registry information, domain controller configuration, and file systems of a domain controller. Choose and reorder the steps that you will take to accomplish the task.

Run Server Manager.
In the left pane of Server Manager, click the Features opti
On the Confirm Installation Selections page, select the Ins
Click the Next button.
On the Installation Results page, click the Close button.
Select the Windows Server Backup checkbox in the Featur
In the right pane, click the Add Features option.

Correct Answer:

Run Server Manager.
In the left pane of Server Manager, click the Features opt
In the right pane, click the Add Features option.
Select the Windows Server Backup checkbox in the Featur
Click the Next button.
On the Confirm Installation Selections page, select the Ins
On the Installation Results page, click the Close button.

QUESTION 3

After the promotion of a computer to a domain controller, a user can use various MMC snap-in consoles to manage Active Directory. Which of these consoles are used for administering and publishing information in the directory, which includes managing users, groups, computers, domains, domain controllers, and organizational units?

A.   Active Directory Users and Computers
B.   Active Directory Sites and Services
C.   Active Directory Domains and Trusts
D.   Active Directory Administrative Center

Correct Answer: D

QUESTION 4

Which of the following statements are true about Resmon? Each correct answer represents a complete solution. Choose all that apply.

A.   It is used for parental control and filtering, and controls which Web sites can be visited and which programs can have Internet access.
B.   It is a system monitoring tool.
C.   It enables users to view and monitor complete resource information about their computer.
D.   It is a lightweight utility for local host monitoring that is queried by tools like nagios over http.

Correct Answer: BCD

QUESTION 5

Which of the following statements best describe the functions of RD Connection Broker in network infrastructure? Each correct answer represents a complete solution. Choose two.

A.   It is used to permit a user to reconnect to his existing session in a load-balanced RD Session Host server farm.
B.   It is used to integrate with Hyper-V to provide virtual machines by using RemoteApp and Desktop Connection.
C.   It is used to redirect users to a shared virtual machine pool where a virtual machine is dynamically assigned.
D.   It is used to enable a user to evenly distribute the session load among RD Session Host servers in a load-balanced RD Session Host server farm.

Correct Answer: AD

QUESTION 6

You work as a Network Administrator for Perfect Solutions Inc. The company has a Windows Active Directory-based single domain single forest network. The functional level of the forest is Windows Server 2008. You are planning to create groups for assigning permissions. Drag and place the appropriate group in front of the group scopes that are given.

Characteristics   **Group Scopes**

Members can come from any domain.
Members can access resources in any domain.   PlaceHolder

Members can come only from local domain.
Members can access resources in any domain.   PlaceHolder

Members can come from any domain.
Members can access resources only in local domain.   PlaceHolder

| Universal | Global | Domain Local |

Correct Answer:

Characteristics   **Group Scopes**

Members can come from any domain.
Members can access resources in any domain.   Universal

Members can come only from local domain.
Members can access resources in any domain.   Global

Members can come from any domain.
Members can access resources only in local domain.   Domain Local

| Universal | Global | Domain Local |

QUESTION 7

You are working on a Windows 2008 environment. You find that some of applications are not responding while creating a project. You want to terminate these applications anyhow and start a new session. What will you do to accomplish the task?

A. Use Device Manager.
B. Use Network Monitor.
C. Use System Monitor.
D. Use Task Manager.
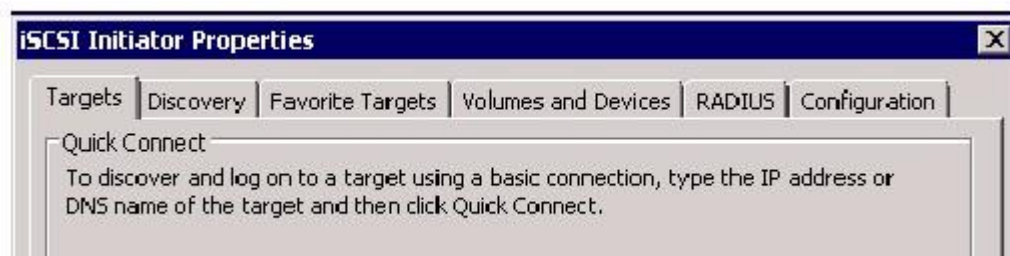

Correct Answer: D

QUESTION 8
You work as a System Administrator for company Inc. The company has a Windows 2008 domain-based network. The network has 120 Windows 7 computers and two Windows Server 2008 R2 servers. You want to ensure that when users log on to any client computer on the network, settings can be changed, but all settings are reset back to their default values when they log on again. What will you do to accomplish the task?

A. Create a Group Policy Object.
B. Create a local user profile.
C. Create a roaming user profile.
D. Create a mandatory user profile.

Correct Answer: D

**QUESTION 9**
You work as a System Administrator for company Inc. You are configuring the iSCSI Initiator program in order to connect a host computer running Windows Server 2008 R2 to an external iSCSI-based storage array. Mark the tab or button that specifies the location of the SAN and Internet Storage Name Service (iSNS) servers when you open the iSCSI Initiator program.

Correct Answer:

QUESTION 10

Which of the following are the levels of printer permissions provided by Windows Server 2008? Each correct answer represents a complete solution. Choose all that apply.

A. Manage documents
B. Print
C. Reload the printer
D. Manage this printer

Correct Answer: ABD

QUESTION 11

You work as a System Administrator for company Inc. The company has a Windows 2008 based network environment. There are twenty client computers running Windows 7 and three servers running Windows server 2008 R2. You want to increase the data availability for these servers without rebuilding them and without investing a large amount of money for purchasing array controllers. What will you do? Each correct answer represents a part of the solution. Choose all that apply.

A. Add another physical drive to each server.
B. Convert the drives from basic disks to dynamic disks.
C. Implement the RAID 1 solution between the two drives.
D. Ensure that the backups are running smoothly.

Correct Answer: ABC

QUESTION 12

Which of the following servers is used to store and forward e-mail messages using several protocols, including SMTP, POP3, and IMAP?

A. File server
B. Monitoring server
C. Database server
D. Mail server

Correct Answer: D

QUESTION 13

You work as a Network Administrator for company Inc. The network of the company contains Windows Server 2008 R2 server and Windows 7 client computers. You have been assigned the task to connect printers to the server. Which of the following ports (on the server) will you use to accomplish the task?

A. VGA port
B. DVI-I port
C. Parallel port
D. PS/2 port

Correct Answer: C

QUESTION 14

You work as a Network Administrator for Net Perfect Inc. The company has a Windows Server 2008 network environment. The network is configured as a Windows Active Directory-based single forest network. You are configuring a new computer. You want to configure the computer's hard disk as a dynamic disk. Which of the following command-line tools will you use to convert a hard disk from basic to dynamic?

A. NTDSUTIL
B. DISKPART
C. FDISK
D. FSUTIL

Correct Answer: B

QUESTION 15

You work as a System Administrator for company Inc. The company has a Windows Server 2008 domain-based network. The network contains one Windows Server 2008 R2 and twelve Windows 7 client computers. You want to centralize management and configuration of operating systems, applications, and user settings. What will you do?

A. Apply NTFS permission.
B. Implement an account policy.
C. Apply an audit policy.
D. Implement a group policy.

Correct Answer: D

QUESTION 16

Choose from the list below the tasks that you can do with the help of the Group Policy Management Console (GPMC).

```
                                          ▲ ◀◀    Link a GPO
                                                  Create a new GPO
                                                  Restore a GPO
                                          ▼ ▶▶    Drop a GPO
                                                  Restrict a GPO
                                                  Edit a GPO
                                                  Validate a GPO
                                                  Back Up a GPO
                                                  Locate a GPO
```

Correct Answer:

```
  Edit a GPO                              ▲ ◀◀    Drop a GPO
  Create a new GPO                                Locate a GPO
  Link a GPO                                      Validate a GPO
  Back Up a GPO                          ▼ ▶▶    Restrict a GPO
  Restore a GPO
```
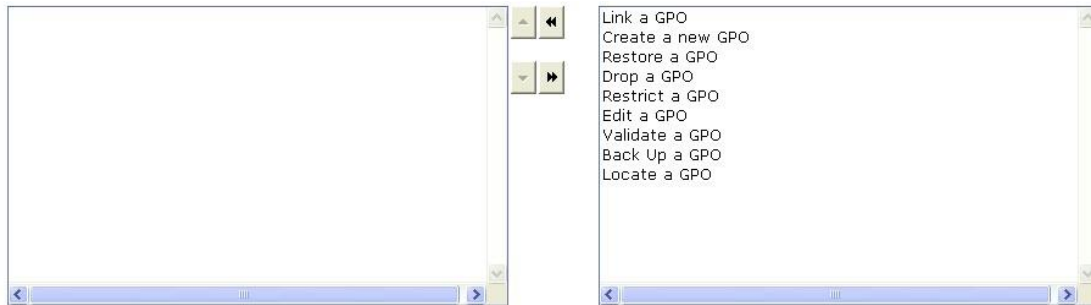

QUESTION 17

Which of the following tools will you use to create image files of an existing system for duplicating or backup purposes?

A. Windows System Image Manager
B. ImageX
C. BCDEdit
D. Setup Manager

Correct Answer: B

QUESTION 18

You work as a Server Administrator for company Inc. The company has its main branch in London and two sub-branches in Tokyo and Paris. The company has 1,500 clients and a number of servers that run Windows Server 2008 R2. You need to distribute workload across the cluster nodes for supporting a larger number of simultaneous clients. What will you do to accomplish the task?

A. Deploy Windows AIK.
B. Use Network Load Balancing.

C. Implement NIC teaming.
D. Create a failover cluster.

Correct Answer: B

QUESTION 19

Adam works as a Software Tester for SecureEnet Inc. He is required to test the software on different operating systems. Adam installs Windows 7 on his laptop, which enables him to create, mount, and boot from VHD files. Which of the following statements are true about Virtual Hard Disk (VHD)? Each correct answer represents a complete solution. Choose all that apply.

A. VHD can be used to install a wide variety of operating systems.
B. VHD allows multiple operating systems to reside on a single host machine
C. VHDs are implemented as files that reside on the native host file system.
D. VHD is a file formatted to be structurally different to a physical Hard Disk Drive.

Correct Answer: ABC

QUESTION 20

You work as a Network Administrator for Perfect Solutions Inc. The company plans to establish a Windows 2008 Active Directory-based network. The network will be configured as a single forest and a multiple-domain network. You are planning for the placement of operations master roles. In this context, which of the following operations master roles are applied to the entire forest? Each correct answer represents a complete solution. Choose all that apply.

A. Domain naming master
B. Schema master
C. PDC emulator master
D. Relative ID (RID) master

Correct Answer: AB

QUESTION 21

You work as a Server Administrator for company Inc. The company has a Windows Server 2008 R2 network environment. The network is configured as a Windows Active Directory-based single forest single domain network. A single domain controller is configured on the network. Some employees reported that they failed to log on to the domain controller. You want to know IP addresses and other details of the accounts of the employees. Which of the following utilities will you use to accomplish the task?

A. Server Manager

B. Resource Monitor
C. Event Viewer
D. Performance Monitor

Correct Answer: C

QUESTION 22

Which of the following statements are true about a device driver? Each correct answer represents a complete solution. Choose all that apply.

A. Device drivers are software-dependent and do not depend on operating systems.
B. It allows higher-level computer programs to interact with a hardware device.
C. It is a program or software that controls a particular device.
D. It works as a translator between the device and the operating system and programs that use the device.

Correct Answer: BCD

QUESTION 23

You work as a Server Administrator for company Inc. The company has deployed Windows Server 2008 R2 for the deployment of workstations and servers. You need to service Windows images offline before the deployment. Which of the following tools will you use to accomplish the task?

A. BootSect
B. DISM
C. BCDEdit
D. BCDBoot

Correct Answer: B

QUESTION 24

You work as a System Administrator for company Inc. The company has a Windows 2008 based network environment. There are twenty client computers running Windows 7 and three servers running Windows Server 2008 R2. You have to ensure that customer service representatives can access the client's information whenever they need. For this, you want to configure a RAID 5 solution in Network Attached Storage (NAS). How many minimum hard drives can you use?

A. 5
B. 6
C. 4
D. 3

Correct Answer: D

QUESTION 25
Web developers request FTP access to the Web server so that they can upload and download updated contents. Which of the following ports does FTP use for communication? Each correct answer represents a complete solution. Choose two.

A. 20
B. 80
C. 23
D. 21

Correct Answer: AD

QUESTION 26
Which of the following types of volumes supported by dynamic disk uses a minimum of three disks for creating a fault-tolerant drive among the drives?

A. RAID-5 volume
B. Mirrored volume
C. Striped volume
D. Spanned volume

Correct Answer: A

QUESTION 27
Which of the following statements are NOT true about the Volume Boot Sector, commonly known as Master Boot Record? Each correct answer represents a complete solution. Choose all that apply.

A. The actual program can be 512 bytes long.
B. Four 16-byte master partition records are present in MBR.
C. The end of MBR marker is h55CC.
D. The volume boot sector is present in cylinder 0, head 0, and sector 1 of the default boot drive.

Correct Answer: AC

QUESTION 28

Which of the following key combinations opens the Task Manager window?

A. Ctrl + Shift + Esc
B. Ctrl + Alt + Esc
C. Ctrl + Alt + Del
D. Ctrl + Shift + Alt

Correct Answer: A

QUESTION 29

Which of the following tasks can you perform without requiring administrative permissions or rights when you log in as a standard user in Windows Server 2008 R2? Each correct answer represents a complete solution. Choose three.

A. Change Windows settings.
B. Connect Bluetooth devices to the computer.
C. Install updates from Windows Update.
D. Reset the network adapter and perform network diagnostic and repair tasks.

Correct Answer: BCD

QUESTION 30

Which of the following statements regarding the Secure Sockets Layer (SSL) security model are true? Each correct answer represents a complete solution. Choose two.

A. The server always authenticates the client.
B. The client can optionally authenticate the server.
C. The server can optionally authenticate the client.
D. The client always authenticates the server.

Correct Answer: CD
