Vendor: Microsoft

Exam Code: 98-369

Exam Name: Cloud Fundamentals

Version: Demo

QUESTION 1
This question requires that you evaluate the underlined text to determine if it is correct.

Your company is implementing Microsoft Office 365 and Exchange Online. You plan to configure the necessary public DNS settings. You need to create an SPF record to authorize the email service and present spoofing.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

A. No change is needed
B. a PTR record
C. an MX record
D. a CNAME record

Correct Answer: A
Explanation:
The SPF (TXT) record helps to prevent other people from using your domain to send spam or other malicious email. Sender policy framework (SPF) records work by identifying the servers that are authorized to send email from your domain.

External DNS records required for Exchange Online
http://howtonetworking.com/msapps/office365-11.htm

QUESTION 2
This question requires that you evaluate the underlined text to determine if it is correct.

You are an IT intern assigned to implement Microsoft Office 365 and Microsoft Intune.

You have not created any Intune policies. You want to control endpoint protection, software updates, and a policy check schedule for a group of devices.

You must deploy a mobile device security policy template.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

A. No change is needed.
B. Windows Firewall Settings
C. Microsoft Intune Agent Settings
D. Microsoft Intune Center Settings

Correct Answer: A
Explanation:
Microsoft Intune Policies are groups of settings that control features on mobile devices and computers. You create policies using templates that contain recommended or customized settings, and then deploy them to device or user groups.

Use policies to manage computers and mobile devices with Microsoft Intune
https://technet.microsoft.com/en-gb/library/dn743712.aspx

QUESTION 3
You are an IT intern for a law firm. The firm is evaluating the use of Microsoft Intune to manage the firm's computing devices. Which two tasks can be performed by using Intune? (Choose two.)

A. deploying a Windows operating system
B. deploying software updates
C. managing Android devices
D. managing Windows servers

Correct Answer: BC
Explanation:
B: When new updates are available from Microsoft Update, or you have created a third-party update, and they are applicable to your managed computers, a notification is displayed on the Overview page of the Updates workspace. After you click this notification link, you can then perform various operations like viewing more information about the update, approving or declining the update, and viewing the computers that will install the update if it is approved.
C: Intune provides secure management of personal and corporate-owned devices across the most popular platforms, including Windows, Windows Phone, iOS, and Android.

QUESTION 4
What is the minimum version of Internet Explorer needed to ensure that Microsoft Office 365 web-based applications have full functionality?

A. Internet Explorer 8
B. Internet Explorer 9
C. Internet Explorer 10
D. Internet Explorer 11

Correct Answer: C
Explanation:
Office 365 is designed to work with the current or immediately previous version of Internet Explorer. Office 365 does not offer code fixes to resolve problems you encounter when using the service with Internet Explorer 9. You should expect the quality of the user experience to diminish over time, and that many new Office 365 experiences might not work at all.

QUESTION 5
You are an IT intern for a retail company.

The staff is not receiving inbound messages, and clients are not receiving the staff's outbound messages.

Which two features of Microsoft Exchange Online should you use to diagnose the issue? (Choose two.)

A. Outlook Web App (OWA) delivery reports
B. Exchange Online Protection
C. Endpoint Protection
D. Message Trace tool

Correct Answer: AD
Explanation:
D: Office 365 Small Business admins can troubleshoot email delivery problems by using the Exchange Online message trace tool. The tool helps admins track specific messages sent in the past 90 days.
A: Office 365 users and admins can also use delivery reports in Outlook Web App to check the delivery status of messages they've sent or received. If you sent a message to five people, for example, you can check the status of the delivery of that message to each person.
Go to Delivery reports settings:
Sign in to Outlook Web App.
At the top of the page, select Outlook (or Mail). Or, select the App launcher , and then select Outlook.
Office 365 navigation options
At the top of the page, select Settings Settings icon > Options. In Options, select Organize email > Delivery reports. Or, in Options, under MAIL > Layout, select Delivery reports.

QUESTION 6
You are an intern for an organization that wants to improve its security. The organization wants multi-factor authentication enforced for all of its users.

You suggest implementing Microsoft Office 365 Business Premium.

Which two types of secondary authentication does this solution support? (Choose two.)

A. notification through a smartphone application
B. entering a username and password
C. entering a text code sent to the user's mobile phone
D. the insertion of a smart card into a reader attached to the user's computer

Correct Answer: AC
Explanation:
Multi-Factor Authentication for Office 365 offers the following subset of Azure Multi-Factor

Authentication capabilities:

▪ Use of a mobile app (online and one-time password [OTP]) as a second authentication factor
▪ Use of a phone call as a second authentication factor
▪ Use of an SMS message as a second authentication factor

QUESTION 7
HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
Each correct selection is worth one point.

Answer Area	Yes	No
A hybrid deployment of Microsoft Office 365 is required when an organization wants to support both on-premise and cloud accounts.	O	O
A hybrid deployment of Microsoft Office 365 is required when an organization hosts an Exchange Server 2003 server or Exchange Server 2007 server.	O	O
Microsoft Office 365 Business Premium support Office 365 hybrid deployments.	O	O

Correct Answer:

Answer Area	Yes	No
A hybrid deployment of Microsoft Office 365 is required when an organization wants to support both on-premise and cloud accounts.	[O]	O
A hybrid deployment of Microsoft Office 365 is required when an organization hosts an Exchange Server 2003 server or Exchange Server 2007 server.	O	[O]
Microsoft Office 365 Business Premium support Office 365 hybrid deployments.	[O]	O

QUESTION 8
You are hired by a local real estate company to set up Microsoft Office 365 Business Premium.
How will the first Microsoft Office 365 account be created?

A. The one-premise domain administrator automatically receives an admin account in Microsoft Office 365 after Directory Synchronization is completed.

B. The account that creates the first DNS record automatically becomes an admin account in Microsoft Office 365.
C. The initial account created in Microsoft Office 365 automatically becomes an admin account.
D. The account that registers the domain automatically becomes an admin account in Microsoft Office 365.

Correct Answer: C

QUESTION 9
HOTSPOT
For each of the following statements, select yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area	Yes	No
Users who lack admin rights to their local computer can use Microsoft Office on Demand	○	○
Microsoft Excel, Access, and Publisher are all available in Microsoft Office on Demand	○	○
The Microsoft SharePoint Online Administrative Console enables Microsoft Office on	○	○

Correct Answer:

Answer Area	Yes	No
Users who lack admin rights to their local computer can use Microsoft Office on Demand	○	○
Microsoft Excel, Access, and Publisher are all available in Microsoft Office on Demand	○	○
The Microsoft SharePoint Online Administrative Console enables Microsoft Office on	○	○

QUESTION 10
You are an IT administrator for Contoso, Ltd. You have subscribed to Microsoft Office 365.

You are preparing to set up your domain. Your company already uses the custom domain name contoso.com for other cloud services.

You need to configure Office 365 to simplify the management of user identities.

What should you do before you create new user accounts?

A. Create a new custom domain name specifically for Office 365.
B. Configure Office 365 to use your custom domain
C. Verify that the automatic domain contoso.onmicrosoft.com is functioning
D. Add the .onmicrosoft suffix to your custom domain name.

Correct Answer: A
Explanation:
Custom domains
To use your own domain name with Office 365 instead of the domain name that you were given at signup, you add the domain to Office 365.

Reference:
https://technet.microsoft.com/en-us/library/office-365-domains.aspx

QUESTION 11
You work in the IT department of a startup company.

The company predicts rapid growth over the next five years and plans of greatly increase its number of employees.

How will a cloud solution such as Microsoft Office 365 help the company prepare for rapid growth?

A. by allowing the company to rely on contract employees to compensate for busy periods
B. by ensuring the company's IT services have 100 percent up time
C. by allowing the company to add new users more securely than when using traditional IT infrastructure
D. by allowing the company to increase its IT capacity for a lower cost than traditional IT infrastructure

Correct Answer: D
Explanation:
Some of the benefits of moving to the Microsoft cloud include the following:

▪ Having predictable and known costs associated with adoption.
▪ Reducing cost in not only immediate monetary value but also in efficiency and resource reallocation benefits.
▪ Outsourcing the hassle of installing, managing, patching, and upgrading extremely complex software systems.

Etc.

For organizations experiencing rapid growth, a top-notch productivity solution can be vital to the success of the business. A cloud-based service that's difficult to manage can divert attention away from a company's core mission. What organizations need is a solution that's simple to use so they can focus on what they do best-growing the business.
