

Microsoft

Exam 98-379

Software Testing Fundamentals

Version: 6.0

[Total Questions: 248]

Topic break down

Topic	No. of Questions
Topic 1: C#	124
Topic 2: VB	124

Topic 1, C#

Question No : 1 - (Topic 1)

Which two techniques are used to gather data when you are profiling an application?
(Choose two.)

- A. Plug-in
- B. Instrumentation
- C. Sampling
- D. Editor extension point
- E. Interrupts

Answer: A,C

Question No : 2 DRAG DROP - (Topic 1)

You create work items to test the features of an application.

Match each work item type to its description. To answer, drag the appropriate work item type from the column on the left to its description on the right. Each work item type may be used once, more than once, or not at all. Each correct match is worth one point.

The screenshot shows a software interface titled "Answer Area" with a table for matching work item types to descriptions. On the left, there is a vertical list of work item types: "bug", "feature", "task", and "test case". On the right, there is a table with two columns: "Work Item Type" and "Description". The "Description" column contains three entries: "potential problems that exist in the code", "additional or new functionality that is added to the project", and "communicates the need to do some work".

Work Item Type	Description
	potential problems that exist in the code
	additional or new functionality that is added to the project
	communicates the need to do some work

Answer:

The screenshot shows the same software interface as above, but with the correct matches. The "bug" type is matched to "potential problems that exist in the code", "feature" is matched to "additional or new functionality that is added to the project", and "task" is matched to "communicates the need to do some work". The "test case" type is not matched. The matches are indicated by dashed red boxes around the work item types in the table.

Work Item Type	Description
bug	potential problems that exist in the code
feature	additional or new functionality that is added to the project
task	communicates the need to do some work
test case	

Explanation;	Description
bug	potential problems that exist in the code
feature	additional or new functionality that is added to the project
task	communicates the need to do some work

Question No : 3 - (Topic 1)

You are an intern. You develop a web application.

You must host it on your local machine.

Which component must you install?

- A. Media Features
- B. Internet Information Services (IIS)
- C. Message Queuing (MSMQ)
- D. Network Protection

Answer: B

Question No : 4 HOTSPOT - (Topic 1)

For each of the following statements, select Agile if the statement applies to agile methodology. Otherwise, select Spiral if the statement applies to spiral methodology. Each correct selection is worth one point.

Answer Area

Agile	Spiral	Description of Behavior
<input type="radio"/>	<input type="radio"/>	This methodology has a fixed number of iterations.
<input type="radio"/>	<input type="radio"/>	This methodology focuses on building tests first.
<input type="radio"/>	<input type="radio"/>	This methodology utilizes daily stakeholder involvement.

Answer:

Answer Area

Agile	Spiral	Description of Behavior
<input type="radio"/>	<input checked="" type="radio"/>	This methodology has a fixed number of iterations.
<input checked="" type="radio"/>	<input type="radio"/>	This methodology focuses on building tests first.
<input checked="" type="radio"/>	<input type="radio"/>	This methodology utilizes daily stakeholder involvement.

Explanation:

Answer Area

Agile	Spiral	Description of Behavior
<input type="radio"/>	<input checked="" type="radio"/>	This methodology has a fixed number of iterations.
<input checked="" type="radio"/>	<input type="radio"/>	This methodology focuses on building tests first.
<input checked="" type="radio"/>	<input type="radio"/>	This methodology utilizes daily stakeholder involvement.

Question No : 5 - (Topic 1)

A system has the following requirement:

- ✍ Patients should be sent to the Emergency Room if their respiratory rate is ≥ 20 and their age is ≥ 65 .

How many test cases should you write to test all combinations of conditions?

- A. 0
- B. 2
- C. 4
- D. 9

Answer: D

Question No : 6 - (Topic 1)

When you log a bug, which two items should you include in the bug report to reproduce the bug? (Choose two.)

- A. The actions leading up to the bug
- B. The author of the code
- C. A description of the actual results
- D. The severity of bug

Answer: A,B

Question No : 7 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

When there is no more physical memory available, data in memory is moved to the hibernation file.

Select the correct answer if the underlined text does not make the statement correct. Select

"No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Master boot record
- C. Swap file
- D. Temporary file folder

Answer: C

Question No : 8 HOTSPOT - (Topic 1)

You review an application used to manage cycling races. When a race is finished, the Finish method is called. You have the following code. (Line numbers are included for reference only.)

```
01 public class FinishLine
02 {
03     [DllImport("User32.dll")]
04     public static extern int MessageBox(int h, string m, string c, int type);
05
06     public void Finish(Racer[] racers)
07     {
08         var leader = racers[0].Time;
09         var timings = racers.Select(r => new
10             {
11                 Racer = r,
12                 Behind = r.Time.Subtract(leader),
13             });
14
15         if (timings.Any(t => t.Behind.TotalMilliseconds < 5))
16             MessageBox(0, "Photo Finish", "Photo Finish", 0);
17     }
18
19     public class Racer
20     {
21         public TimeSpan Time;
22     }
23 }
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area

Yes	No	Description of Behavior
<input type="radio"/>	<input type="radio"/>	The timing enumeration code at line 15 will always run in the same amount of time.
<input type="radio"/>	<input type="radio"/>	Displaying the message box will always take the same amount of time.
<input type="radio"/>	<input type="radio"/>	Calling the Finish method can cause exceptions.

Answer:

Answer Area

Yes	No	Description of Behavior
<input type="radio"/>	<input checked="" type="radio"/>	The timing enumeration code at line 15 will always run in the same amount of time.
<input checked="" type="radio"/>	<input type="radio"/>	Displaying the message box will always take the same amount of time.
<input checked="" type="radio"/>	<input type="radio"/>	Calling the Finish method can cause exceptions.

Explanation:

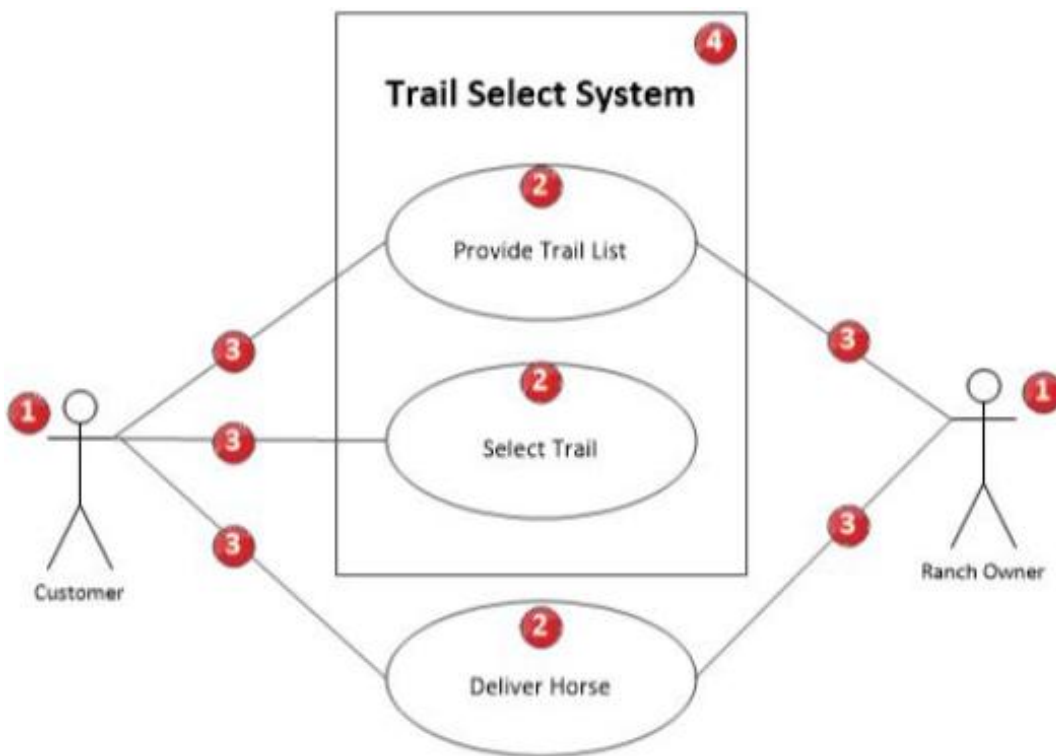

Answer Area

Yes	No	Description of Behavior
<input type="radio"/>	<input checked="" type="radio"/>	The timing enumeration code at line 15 will always run in the same amount of time.
<input checked="" type="radio"/>	<input type="radio"/>	Displaying the message box will always take the same amount of time.
<input checked="" type="radio"/>	<input type="radio"/>	Calling the Finish method can cause exceptions.

Question No : 10 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

A project that uses **spiral** methodology allows for incremental refinement through each cycle.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Top-down
- C. Bottom-up
- D. Waterfall

Answer: A

Question No : 11 - (Topic 1)

You use Microsoft Test Manager to test a solution.

Which two statements about using test cases in Microsoft Test Manager are correct?
(Choose two.)

- A. You can share steps between different test cases.
- B. You need to add all fields to a test case when you create the test case.
- C. You must define test cases by using Microsoft Test Manager.
- D. You can add attachments and hyperlinks to test cases.

Answer: A,B

Question No : 12 - (Topic 1)

You are asked to develop an application that allows computer science students to easily post project status information to fellow project team members.

You need to design a user-centric test plan.

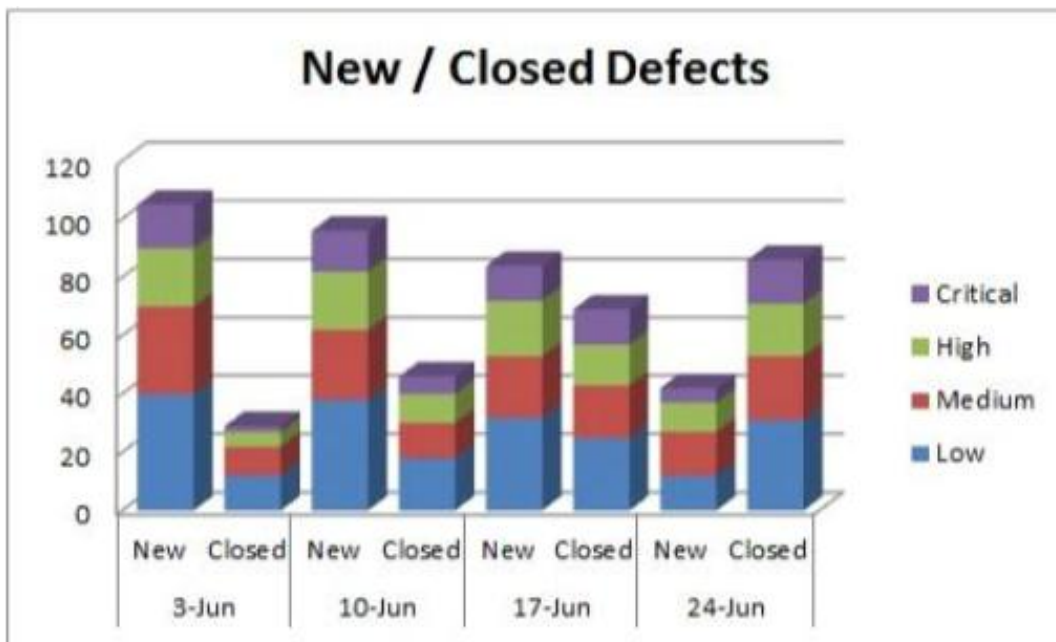

Which source will provide the requirements for your test plan?

- A. The students and project team members
- B. The application programming team
- C. The university Information Technology (IT) department
- D. The computer science faculty

Answer: A

Question No : 13 HOTSPOT - (Topic 1)

A weekly project report contains the following bar graph:

Use the drop-down menus to complete each statement. Each correct selection is worth one point.

Answer Area

The open rate for new defects is

The close rate for defects is

Answer Area

The open rate for new defects is

constant
decreasing
increasing

The close rate for defects is

constant
decreasing
increasing

Answer:

Answer Area

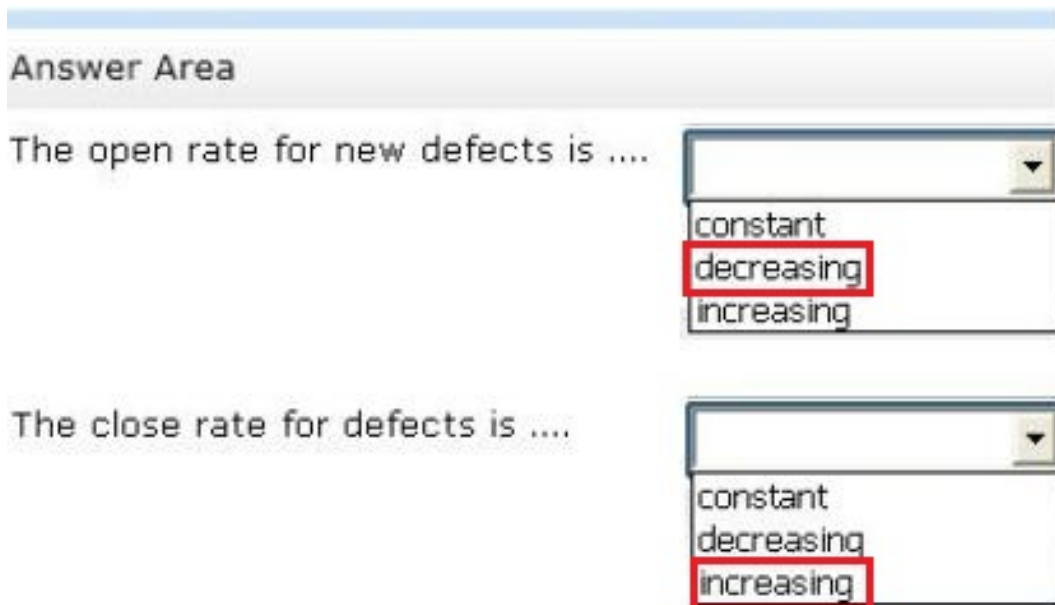

The open rate for new defects is

constant
decreasing
increasing

The close rate for defects is

constant
decreasing
increasing

Question No : 14 DRAG DROP - (Topic 1)

You are testing a software development project.

You need to determine which tests you should run manually and which tests should be automated.

Match each type of test to its test case. To answer, drag the appropriate type from the column on the left to its test case on the right. Each type may be used once, more than once, or not at all. Each correct match is worth one point.

Answer:

Answer Area		
	Test Case	Type of Test
automated test	Identify incorrect return values.	automated test
manual test	Identify usability issues.	manual test
	Detect application hangs and crashes.	automated test

Explanation:

Test Case	Type of Test
Identify incorrect return values.	automated test
Identify usability issues.	manual test
Detect application hangs and crashes.	automated test

Question No : 15 DRAG DROP - (Topic 1)

Match each diagram to its description in the requirements model. To answer, drag the appropriate diagram from the column on the left to its description on the right. Each diagram may be used once, more than once, or not at all. Each correct match is worth one point.

Answer Area		
	Diagram	Description
Activity Diagram		who uses the system and what they do with it
Use Case Diagram		glossary of types that are used to describe the requirements; the types visible at the system's interface
Sequence Diagram		flow of work and information between activities performed by users and a system or its parts
Conceptual Class Diagram		sequence of interactions between users and a system or its parts

Answer:

Answer Area	
Diagram	Description
Activity Diagram	
Use Case Diagram	who uses the system and what they do with it
Sequence Diagram	
Conceptual Class Diagram	glossary of types that are used to describe the requirements; the types visible at the system's interface
Activity Diagram	flow of work and information between activities performed by users and a system or its parts
Sequence Diagram	sequence of interactions between users and a system or its parts

Explanation:

Diagram	Description
Use Case Diagram	who uses the system and what they do with it
Conceptual Class Diagram	glossary of types that are used to describe the requirements; the types visible at the system's interface
Activity Diagram	flow of work and information between activities performed by users and a system or its parts
Sequence Diagram	sequence of interactions between users and a system or its parts

Question No : 16 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

Software testing measures aspects of the **development team**.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Application
- C. Development schedule
- D. Potential market

Answer: B

Question No : 17 - (Topic 1)

Which two tools can you use to set automated test priority? (Choose two.)

- A. MSTest.exe
- B. vSTest.Console.exe
- C. Visual Studio 2012
- D. Microsoft Test Manager

Answer: A,B

Question No : 18 - (Topic 1)

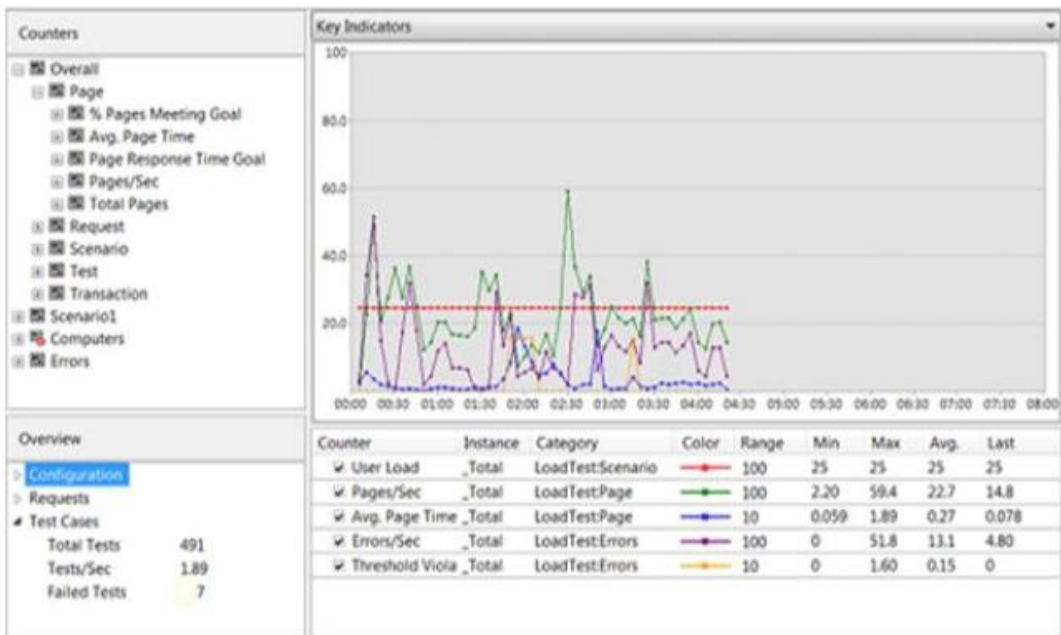

Which two items are measurements of software quality? (Choose two.)

- A. End-user acceptance testing
- B. Requirements analysis
- C. Program load time
- D. User interface responsiveness

Answer: A,B

Question No : 19 HOTSPOT - (Topic 1)

You run a load test in Microsoft Test Manager. You monitor performance counters by using the Load Test Analyzer. The following graphic displays representative data:

Use the drop-down lists to complete each statement. Each correct selection is worth one point.

Answer Area

The load test uses the ... pattern.

In general, the percentage of errors per second ... as the number of pages rendered increases.

Answer Area

The load test uses the ... pattern.
 step
 constant
 goal-based

In general, the percentage of errors per second ... as the number of pages rendered increases.
 decreases
 increases
 remains the same

Answer:

Answer Area

The load test uses the ... pattern.

step
constant
goal-based

In general, the percentage of errors per second ... as the number of pages rendered increases.

decreases
increases
remains the same

Explanation:

Answer Area

The load test uses the ... pattern.

step
constant
goal-based

In general, the percentage of errors per second ... as the number of pages rendered increases.

decreases

Question No : 21 - (Topic 1)

You are performing a step in a test case. The test case has the following specifications:

-  A return value of Supervisor
-  A response time of less than 5 seconds

When you perform the step, the return value is Supervisor, and the response time is 10 seconds.

Which item most accurately reports the results of this test step?

- A. Failed - Data Error
- B. Failed - Constraint Error

- C. Failed - Performance Error
- D. Passed - No Error

Answer: C

Question No : 22 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

Localization testing is used to prevent the reappearance of bugs.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Accessibility
- C. Functional
- D. Regression

Answer: D

Question No : 23 - (Topic 1)

You have the following code. (Line numbers are included for reference only.)

```
01 [TestMethod]
02 [ExpectedException(typeof(ArgumentException))]
03 public void Withdraw_AmountMoreThanBalance_Throws()
04 {
05     var account = new CheckingAccount("Oliver", 10.0);
06     account.Withdraw(11.0);
07 }
```

Which exception must be thrown in order for the test case to pass?

- A. System.Exception
- B. ExpectedException
- C. ArgumentException

D. InvalidArgumentException

Answer: C

Question No : 24 - (Topic 1)

A system has the following requirements:

- ✍ If the order total is equal to or more than \$50 and less than or equal to \$100, then a 2 percent discount is applied,
- ✍ If the order total is more than \$100 and less than or equal to \$200, then a 5 percent discount is applied.
- ✍ If the order total is more than \$200, then a 10 percent discount is applied.

How many conditions must you test?

- A. 0
- B. 1
- C. 3
- D. 5

Answer: D

Question No : 25 - (Topic 1)

How many test plans are created in projects that use an agile methodology?

- A. One master test plan and one test plan for each sprint
- B. One test plan for each sprint
- C. One master test plan
- D. Multiple test plans for each sprint

Answer: A

Question No : 26 HOTSPOT - (Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area		
Yes	No	Statement
<input type="radio"/>	<input type="radio"/>	Coded user interface tests can be automated.
<input type="radio"/>	<input type="radio"/>	Unit tests can be automated.
<input type="radio"/>	<input type="radio"/>	Load tests can be automated.

Answer:

Answer Area		
Yes	No	Statement
<input checked="" type="checkbox"/>	<input type="radio"/>	Coded user interface tests can be automated.
<input checked="" type="checkbox"/>	<input type="radio"/>	Unit tests can be automated.
<input checked="" type="checkbox"/>	<input type="radio"/>	Load tests can be automated.

Explanation:

Answer Area		
Yes	No	Statement
<input checked="" type="checkbox"/>	<input type="radio"/>	Coded user interface tests can be automated.
<input checked="" type="checkbox"/>	<input type="radio"/>	Unit tests can be automated.
<input checked="" type="checkbox"/>	<input type="radio"/>	Load tests can be automated.

Question No : 27 - (Topic 1)

You partner with students from England, India, and Dubai on a project that uses the agile

methodology.

You need to ensure there are no risks to collaborating on the project.

Which two items must you address to prevent risks to collaboration? (Choose two.)

- A. Creating test scripts
- B. Code reviews
- C. Stakeholder relations
- D. Communication issues

Answer: A,B

Question No : 28 - (Topic 1)

Which two conditions are examples of exit criteria? (Choose two.)

- A. All test scripts have passed.
- B. All test cases have been written.
- C. All defects are logged.
- D. All unresolved defects are deferred by the stakeholders.

Answer: A,B

Question No : 29 - (Topic 1)

Which three products must be installed to access Microsoft's built-in test reporting? (Choose three.)

- A. Microsoft Test Manager
- B. Team Foundation Server
- C. Visual Studio 2012
- D. Windows 8
- E. Internet Explorer

Answer: A,B,C

Question No : 30 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

Scope describes how important it is to fix a defect, or how quickly a defect must be fixed.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Effect level
- C. Priority
- D. Severity

Answer: C

Question No : 31 HOTSPOT - (Topic 1)

You test an application by using Coded UI Tests.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area		
Yes	No	
<input type="radio"/>	<input type="radio"/>	You can instruct the tests to wait for certain events to occur during a coded UI test playback.
<input type="radio"/>	<input type="radio"/>	You can create Coded UI tests to test the entire user interface for the application.
<input type="radio"/>	<input type="radio"/>	You must use Microsoft Test Manager to run Coded UI tests.

Answer:

Answer Area

Yes	No	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	You can instruct the tests to wait for certain events to occur during a coded UI test playback.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	You can create Coded UI tests to test the entire user interface for the application
<input checked="" type="checkbox"/>	<input type="checkbox"/>	You must use Microsoft Test Manager to run Coded UI tests.

Explanation:

Answer Area

Yes	No	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	You can instruct the tests to wait for certain events to occur during a coded UI test playback.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	You can create Coded UI tests to test the entire user interface for the application
<input checked="" type="checkbox"/>	<input type="checkbox"/>	You must use Microsoft Test Manager to run Coded UI tests.

C:\Users\Kamran\Desktop\image.jpg

Question No : 32 - (Topic 1)

You are using Microsoft Test Manager to run automated tests in a virtual environment. What are two of the advantages of using a virtual environment? (Choose two.)

- A. Virtual environments allow for easy debugging of code.
- B. Virtual environments can store a snapshot of the environment.
- C. Virtual environments can run multiple copies of testing environments.
- D. Virtual environments make error reporting easier.

Answer: A,B

Question No : 33 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

The **test configuration** informs the tester of the setup that is required for the tests in a test plan.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Test case
- C. Test suite
- D. Expected test result

Answer: A

Question No : 34 - (Topic 1)

You are developing an application to track the migration patterns of birds.

The application must support 250 simultaneous users.

How should you test for this requirement?

- A. Perform regression testing.
- B. Perform load testing.
- C. Host the application on a cluster.
- D. Limit the functionality of the application.

Answer: B

Question No : 35 - (Topic 1)

You review an application to manage 5K races. The application includes a method named Match to associate racers based on rank. (Line numbers are included for reference only.)

```
01 public class Matcher
02 {
03     public void Match(Racer[] racers)
04     {
05         foreach (var racer in racers)
06         {
07             var rank = racer.Rank;
08             foreach (var pair in racers)
09             {
10                 if (pair.Rank == rank)
11                     SetupRace(pair, racer);
12             }
13         }
14     }
15
16     public class Racer
17     {
18         public int Rank;
19         public string Name;
20     }
21
22     private void SetupRace(Racer pair, Racer racer) { }
23 }
```

When the number of racers passed to the method doubles, by what factor does the number of iterations to find a match increase?

- A. 1
- B. 2
- C. 4
- D. 10

Answer: C

Question No : 36 HOTSPOT - (Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area		
Yes	No	Description of Accessibility
<input type="radio"/>	<input type="radio"/>	Keyboard accessibility utilizes shortcuts, such as CTRL+X and CTRL+V, to test the accessibility of an application.
<input type="radio"/>	<input type="radio"/>	High contrast testing modifies the operating font size and font colors to test the accessibility of an application.
<input type="radio"/>	<input type="radio"/>	Narrator is a Windows tool that is used to test Assistive Technology Compatibility.

Answer:

Answer Area		
Yes	No	Description of Accessibility
<input checked="" type="radio"/>	<input type="radio"/>	Keyboard accessibility utilizes shortcuts, such as CTRL+X and CTRL+V, to test the accessibility of an application.
<input checked="" type="radio"/>	<input type="radio"/>	High contrast testing modifies the operating font size and font colors to test the accessibility of an application.
<input checked="" type="radio"/>	<input type="radio"/>	Narrator is a Windows tool that is used to test Assistive Technology Compatibility.

Explanation:

C:\Users\Kamran\Desktop\image.jpg

Question No : 37 - (Topic 1)

You are triaging the bug summary reports and review two bugs named Bug ID 1 and Bug ID 2.

Bug ID 1 and Bug ID 2 are identical.

Which two steps should you take to relate the two bugs? (Choose two.)

- A. Add the defect ID of Bug ID 1 to Bug ID 2.
- B. Change the status of Bug ID 2 to duplicated.
- C. Change the status of both bug reports to duplicated.
- D. Change the status of Bug ID 1 to rejected.
- E. Change the priority of Bug ID 1 to duplicated.

Answer: A,B

Question No : 38 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

A good test plan defines measurable criteria at each project feasibility study.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Milestone
- C. Status meeting
- D. Turnover

Answer: B

Question No : 39 - (Topic 1)

You are reviewing a test plan for an application that stores the results for certification exams in a database.

The success criterion is that when 450 simultaneous clients are connected to the database, an acceptable response time is maintained for all clients.

Which testing technique should you use?

- A. Black box
- B. White box
- C. Regression
- D. Integration

Answer: B

Question No : 40 - (Topic 1)

Visualizing the flow of work, limiting work in progress, managing flow, making policies explicit, implementing feedback loops, and improving collaboratively while evolving experimentally are all practices of which software development methodology?

- A. lean
- B. incremental
- C. spiral
- D. kanban

Answer: D

Question No : 41 DRAG DROP - (Topic 1)

Match each testing type to its definition. To answer, drag the appropriate testing type from the column on the left to its definition on the right. Each testing type may be used once, more than once, or not at all. Each correct match is worth one point.

Answer Area	
Testing Type	Type Definition
Load Testing	determines the throughput required to support the anticipated peak production load
Performance Testing	determines the speed, scalability, and stability characteristics of an application
Unit Testing	a test that targets a module of code where that module is any logical subset of the entire existing code base of the application
Smoke Testing	an initial run of a system test to see if your application can perform its operations under a normal load

Answer:

	Answer Area	
	Testing Type	Type Definition
Load Testing	Load Testing	determines the throughput required to support the anticipated peak production load
Performance Testing	Performance Testing	determines the speed, scalability, and stability characteristics of an application
Unit Testing	Unit Testing	a test that targets a module of code where that module is any logical subset of the entire existing code base of the application
Smoke Testing	Smoke Testing	an initial run of a system test to see if your application can perform its operations under a normal load

Explanation:

Testing Type	Type Definition
Load Testing	determines the throughput required to support the anticipated peak production load
Performance Testing	determines the speed, scalability, and stability characteristics of an application
Unit Testing	a test that targets a module of code where that module is any logical subset of the entire existing code base of the application
Smoke Testing	an initial run of a system test to see if your application can perform its operations under a normal load

Question No : 42 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

In software testing, the degree to which the solution has been tested is called code coverage.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Functional coverage
- C. Statement coverage

D. State coverage

Answer: A

Question No : 43 DRAG DROP - (Topic 1)

Match each Microsoft Test Manager component to its description. To answer, drag the appropriate component from the column on the left to its description on the right. Each component may be used once, more than once, or not at all. Each correct match is worth one point.

Answer Area		
Test Controller	Description	Microsoft Test Manager Component
Test Agent	distribute and Manage tests remotely	<input type="text"/>
	install Software	<input type="text"/>
	run Tests	<input type="text"/>
	collect Test Data	<input type="text"/>

Answer:

Answer Area		
Test Controller	Description	Microsoft Test Manager Component
Test Agent	distribute and Manage tests remotely	Test Controller
	install Software	Test Agent
	run Tests	Test Agent
	collect Test Data	Test Agent

Explanation:

Description	Microsoft Test Manager Component
distribute and Manage tests remotely	Test Controller
install Software	Test Agent
run Tests	Test Agent
collect Test Data	Test Agent

Question No : 44 - (Topic 1)

Which report is an important tool for monitoring the status of open defects in a project?

- A. Weekly Bug Summary
- B. Weekly Project Budget
- C. Weekly Project Schedule
- D. Weekly Test Plan Summary

Answer: A

Question No : 45 - (Topic 1)

You use Microsoft Test Manager to test software projects.

What do test configurations specify?

- A. The number of computers on which you run tests
- B. The data that must be collected when you run tests

- C. The combination of hardware and software on which you run tests
- D. The portion of the project and build version that you test

Answer: C

Question No : 46 HOTSPOT - (Topic 1)

Which features does Visual Studio Lab Management support? For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area

- | Yes | No | |
|-----------------------|-----------------------|--|
| <input type="radio"/> | <input type="radio"/> | You can use physical machines in addition to virtual machines. |
| <input type="radio"/> | <input type="radio"/> | You can run both manual and automated tests. |
| <input type="radio"/> | <input type="radio"/> | You can save the state of lab environments. |

Answer:

Answer Area

- | Yes | No | |
|-------------------------------------|-----------------------|--|
| <input checked="" type="checkbox"/> | <input type="radio"/> | You can use physical machines in addition to virtual machines. |
| <input checked="" type="checkbox"/> | <input type="radio"/> | You can run both manual and automated tests. |
| <input checked="" type="checkbox"/> | <input type="radio"/> | You can save the state of lab environments. |

Explanation:

Answer Area

Yes

No

You can use physical machines in addition to virtual machines.

You can run both manual and automated tests.

You can save the state of lab environments.

C:\Users\Kamran\Desktop\image.jpg

Question No : 47 - (Topic 1)

You are using Test-Driven Development. Automated unit tests should be designed:

- A. During final user acceptance testing.
- B. After the coding milestone has been met.
- C. Before the code that is being tested has been written.
- D. At the same time as the code that is being tested.

Answer: D

Question No : 48 - (Topic 1)

Which item should be used to test multiple scenarios to validate specific sets of behaviors?

- A. A test case
- B. A test harness
- C. A test suite
- D. A test scenario

Answer: C

Question No : 49 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

Bug convergence is the point at which the number of bugs resolved exceeds the number of bugs found.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Baseline
- C. Burndown
- D. Code coverage

Answer: A

Question No : 50 - (Topic 1)

What is the last step that must be performed before you can close a bug?

- A. The bug is assigned a severity and priority.
- B. The bug is assigned to a developer for correction.
- C. The tester re-tests the bug and verifies it is fixed.
- D. The developer reports that the bug is fixed.

Answer: A

Question No : 51 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

Software testing ensures **a known quantity of defects**.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. That the application has no defects
- C. That users will accept the application
- D. That the application is high quality

Answer: A

Question No : 52 - (Topic 1)

A user input field must allow only numeric values from 1 to 10. You need to test the boundary conditions of the field.

Which values should you specify in the test case condition?

- A. Invalid alphabetic values, such as AA
- B. Every value from 0 to 99
- C. Every value from 1 to 10
- D. 0, 1, 10, and 11

Answer: A

Question No : 53 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

Test coverage measures, in some specific way, the amount of testing performed by a set of tests.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Testability
- C. Test planning
- D. Test implementation

Answer: A

Question No : 54 - (Topic 1)

What does a checklist burnup chart display?

- A. The estimated remaining hours of work for the sprint
- B. The count of items completed and whether the team will complete the remaining items by the end of the sprint
- C. The actual remaining hours of work for the sprint
- D. The count of items remaining and whether the team will complete the remaining items by the end of the sprint

Answer: B

Question No : 55 - (Topic 1)

Which three statements are characteristics of a good unit test? (Choose three.)

- A. Is very limited in scope
- B. Uses stubs or mock objects
- C. Includes environmental dependencies such as databases, file systems, networks, and queues
- D. Hides the expected results from the tester
- E. Runs and passes in isolation

Answer: B,C,D

Question No : 56 - (Topic 1)

You are developing a web application by using C*.

You must store an undetermined number of usernames.

What should you use to store the data?

- A. String
- B. String []
- C. List<string>
- D. Long

Answer: C

Question No : 57 - (Topic 1)

You are writing tests for an application that tracks the results of car races. The application includes a function named `GetResults` that returns the results for a race with a given name, as shown in the following code. (Line numbers are included for reference only.)

```
01 public class Loader
02 {
03     public List<RaceResult> GetResults(string raceName)
04     {
05         var conn = new SqlCommand("sp_GetResults");
06         conn.Parameters.Add("name", raceName);
07         var reader = conn.ExecuteReader();
08         var hasResults = reader.Read();
09
10         if (!hasResults)
11             throw new ArgumentException();
12
13         var result = new List<RaceResult>();
14         do
15         {
16             result.Add(new RaceResult
17             {
18                 RaceName = raceName,
19                 Data = reader.GetSqlXml(0),
20             });
21         } while (reader.Read());
22
23         return result;
24     }
25
26     public class RaceResult
27     {
28         public string RaceName { get; set; }
29         public SqlXml Data { get; set; }
30     }
31 }
```

You need to test that the `GetResults` function creates a `RaceResult` object containing the

race name and data for each race result stored in the database.

What type of test must you use?

- A. Stress
- B. Integration
- C. Performance
- D. Unit

Answer: B

Question No : 58 HOTSPOT - (Topic 1)

You view the following bug triage workbook on the team portal for a project:

ID	Priority	Severity	Title
1	1	2	Users cannot access the application during certain periods of each day.
2	1	4	Some user settings are not retained between sessions.
3	2	3	Users cannot access the application from mobile web browsers.
4	1	1	Saving new customer records throws an error.
5	3	3	Orders more than 90 days old are not displayed.

Use the drop-down menus to complete each statement. Each correct selection is worth one point.

Answer Area

ID number ... has the highest impact on both the project and the business.

ID number ... has the least impact on both the project and the business.

Answer Area

ID number ... has the highest impact on both the project and the business.

- 1
- 2
- 3
- 4

Question No : 59 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

Finding bugs is a primary focus of user-centric testing.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Application usability
- C. Program optimization
- D. Validating results

Answer: B

Question No : 60 HOTSPOT - (Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area		
Yes	No	Description of Behavior
<input type="radio"/>	<input type="radio"/>	Automated test scripts provide reliable, repeatable, and reusable testing of a software product.
<input type="radio"/>	<input type="radio"/>	Automated test scripts are a good way of performing regression testing.
<input type="radio"/>	<input type="radio"/>	Automated test scripts will need to be maintained as the code is changed.

Answer:

Answer Area		
Yes	No	Description of Behavior
<input checked="" type="radio"/>	<input type="radio"/>	Automated test scripts provide reliable, repeatable, and reusable testing of a software product.
<input checked="" type="radio"/>	<input type="radio"/>	Automated test scripts are a good way of performing regression testing.
<input checked="" type="radio"/>	<input type="radio"/>	Automated test scripts will need to be maintained as the code is changed.

Explanation:

Question No : 61 - (Topic 1)

You are developing a plan to test an application.

The test must run weekly and consists of step-by-step walkthroughs of major functionality.

Which testing technique should you use?

- A. Automated
- B. Ad hoc
- C. Regression
- D. Unit

Answer: A

Question No : 62 DRAG DROP - (Topic 1)

Match each test with its definition. To answer, drag the appropriate test from the column on the left to its definition on the right. Each test may be used once, more than once, or not at all. Each correct match is worth one point.

Answer Area	
Test	Definition
<input type="text"/>	tests the functionality of a single module or block of code
<input type="text"/>	tests the end-user's satisfaction with the application functionality
<input type="text"/>	tests the ability of the components of the application to function together
<input type="text"/>	tests the usability of the application

On the left side of the interface, there are four draggable test types: Unit test, Acceptance test, Integration test, and UI test.

Answer:

Answer Area	
Test	Definition
Unit test	tests the functionality of a single module or block of code
Acceptance test	tests the end-user's satisfaction with the application functionality
Integration test	tests the ability of the components of the application to function together
UI test	tests the usability of the application

Explanation:

Test	Definition
Unit test	tests the functionality of a single module or block of code
Acceptance test	tests the end-user's satisfaction with the application functionality
Integration test	tests the ability of the components of the application to function together
UI test	tests the usability of the application

Question No : 63 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

The participants of a project that uses **agile** methodology write a test plan once during the entire project.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Extreme programming (XP)
- C. Spiral
- D. Waterfall

Answer: D

Question No : 64 - (Topic 1)

Your team uses the agile methodology. At the end of the sprint, your team looks for ways to improve.

This process is called:

- A. Fail-fast
- B. Refactoring
- C. Retrospective
- D. Backlog

Answer: C

Question No : 65 - (Topic 1)

You are using Microsoft Visual Studio Unit Test Framework.

What are the two minimum requirements for a test class? (Choose two.)

- A. One of the methods must have the TestCategory attribute.
- B. The class must have the TestInitialize attribute.
- C. The class must have the TestClass attribute.
- D. One of the methods must have the TestMethod attribute.

Answer: A,B

Question No : 66 - (Topic 1)

You are identifying the approach and techniques to use when testing a system. Each build of the system will require retesting over 5000 test cases.

A new build of the system is performed every two days.

You must fully retest all 5000 test cases before the next build is complete.

Which two testing techniques should you use? (Choose two.)

- A. Stress testing
- B. Manual testing
- C. Regression testing
- D. Automated testing

Answer: A,B

Question No : 67 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

The weekly testing status report is part of the project charter.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Backlog
- C. Project communication plan
- D. Sprint documents

Answer: C

Question No : 68 DRAG DROP - (Topic 1)

Match each type of test to its description. To answer, drag the appropriate type from the column on the left to its description on the right. Each type may be used once, more than once, or not at all. Each correct match is worth one point.

	Answer Area	
Smoke Test	Description	Type of Test
Build Verification Test	includes unit tests and regression tests	<input type="text"/>
	tests the basic functionality of all aspects of a project	<input type="text"/>
	determines if the current version of an application is stable enough to proceed with further testing	<input type="text"/>

Answer:

	Answer Area	
Smoke Test	Description	Type of Test
Build Verification Test	includes unit tests and regression tests	Build Verification Test
	tests the basic functionality of all aspects of a project	Smoke Test
	determines if the current version of an application is stable enough to proceed with further testing	Smoke Test

Explanation:

Description	Type of Test
includes unit tests and regression tests	Build Verification Test
tests the basic functionality of all aspects of a project	Smoke Test
determines if the current version of an application is stable enough to proceed with further testing	Smoke Test

Question No : 73 DRAG DROP - (Topic 1)

Match each status to its test step. To answer, drag the appropriate status from the column on the left to its test step on the right. Each status may be used once, more than once, or not at all. Each correct match is worth one point.

Answer Area				
	Test Step	Expected Result	Actual Result	Status
Pass	Enter 1899 in the birth year field	Prompt is displayed: "Valid birth years are from 1900 to 2013"; Response time less than 1 sec	Proper prompt is displayed; Response time: 500 ms	<input type="text"/>
Fail - Performance error	Enter 1948 in the birth year field	"65" is displayed in the Age field; Response time less than 1 sec	"65" is displayed in the Age field; Response time: 1500 ms	<input type="text"/>
Fail - Constraint error	Enter 2033 in the birth year field	Prompt is displayed: "Valid birth years are from 1900 to 2013"; Response time less than 1 sec	"-20" is displayed in the Age field; Response time: 750 ms	<input type="text"/>
Fail - Logic error	Enter "AAAA" in the birth year field	Prompt is displayed: "Please enter a valid year"; Response time less than 1 sec	Proper prompt is displayed; Response time: 300 ms	<input type="text"/>

Answer:

Answer Area				
	Test Step	Expected Result	Actual Result	Status
Pass	Enter 1899 in the birth year field	Prompt is displayed: "Valid birth years are from 1900 to 2013"; Response time less than 1 sec	Proper prompt is displayed; Response time: 500 ms	Pass
Fail - Performance error	Enter 1948 in the birth year field	"65" is displayed in the Age field; Response time less than 1 sec	"65" is displayed in the Age field; Response time: 1500 ms	Fail - Performance error
Fail - Constraint error	Enter 2033 in the birth year field	Prompt is displayed: "Valid birth years are from 1900 to 2013"; Response time less than 1 sec	"-20" is displayed in the Age field; Response time: 750 ms	Fail - Constraint error
Fail - Logic error	Enter "AAAA" in the birth year field	Prompt is displayed: "Please enter a valid year"; Response time less than 1 sec	Proper prompt is displayed; Response time: 300 ms	Fail - Logic error

Explanation:

	Expected Result	Actual Result	Status
Enter 1899 in the birth year field	Prompt is displayed: "Valid birth years are from 1900 to 2013"; Response time less than 1 sec	Proper prompt is displayed; Response time: 500 ms	Pass
Enter 1948 in the birth year field	"65" is displayed in the Age field; Response time less than 1 sec	"65" is displayed in the Age field; Response time: 1500 ms	Fail - Performance error
Enter 2033 in the birth year field	Prompt is displayed: "Valid birth years are from 1900 to 2013"; Response time less than 1 sec	"-20" is displayed in the Age field; Response time: 750 ms	Fail - Constraint error
Enter "AAAA" in the birth year field	Prompt is displayed: "Please enter a valid year"; Response time less than 1 sec	Proper prompt is displayed; Response time: 300 ms	Pass

Question No : 74 - (Topic 1)

You create code that calculates the speed of a vehicle by using the following formula:

$$\text{Speed} = \text{Miles} / \text{Hours}$$

When the code runs, the application throws a divide by zero exception.

Which type of error is thrown by the application?

- A. Compile error
- B. Logic error
- C. Run-time error
- D. Syntax error

Answer: C

Question No : 75 - (Topic 1)

Which two types of logging are supported by the UI Automation Test Library? (Choose two.)

- A. XML
- B. HTML
- C. XPS
- D. Console

Answer: A,B

Question No : 76 - (Topic 1)

This question requires that you evaluate the underlined text to determine if it is correct.

Localization testing checks the quality of the changes made to a product's user interface (UI) or configuration settings for a particular target culture/locale.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. Accessibility
- C. Regression
- D. Performance

Answer: A

Question No : 77 - (Topic 1)

Which item should be used to simulate error conditions during a unit test without causing errors on a live system?

- A. Stress tests
- B. Mock objects
- C. Manual tests
- D. Database resources

Answer: B

Question No : 78 DRAG DROP - (Topic 1)

Match each report to its definition. To answer, drag the appropriate report from the column on the left to its definition on the right. Each report may be used once, more than once, or not at all. Each correct match is worth one point.

Answer Area	
Report	Definition
Failure Analysis Report	
Test Case Readiness Report	Shows the number of test cases that can be run and that have been run.
Test Plan Progress Report	Shows the number of test cases that have not been run, or are blocked, failed, or passed.
	Shows the number of tests that previously passed but do not currently pass.

Answer:

Answer Area	
Report	Definition
Failure Analysis Report	
Test Case Readiness Report	Shows the number of test cases that can be run and that have been run.
Test Plan Progress Report	Shows the number of test cases that have not been run, or are blocked, failed, or passed.
Failure Analysis Report	Shows the number of tests that previously passed but do not currently pass.
