ECCouncil

Exam ECSS

EC-Council Certified Security Specialist

Version: 6.0

[Total Questions: 337]

Topic 1, Volume A

Question No : 1 - (Topic 1)

Firewalking is a technique that can be used to gather information about a remote network protected by a firewall. This technique can be used effectively to perform information gathering attacks. In this technique, an attacker sends a crafted packet with a TTL value that is set to expire one hop past the firewall. Which of the following are pre-requisites for an attacker to conduct firewalking?

Each correct answer represents a complete solution. Choose all that apply.

A. ICMP packets leaving the network should be allowed.
B. An attacker should know the IP address of the last known gateway before the firewall.
C. There should be a backdoor installed on the network.
D. An attacker should know the IP address of a host located behind the firewall.

Answer: A,B,D

Question No : 2 - (Topic 1)

Which of the following security protocols are based on the *802.11i standard*?

Each correct answer represents a complete solution. Choose all that apply.

A. WEP
B. WPA2
C. WPA
D. WEP2

Answer: B,C

Question No : 3 - (Topic 1)

Which of the following OSI layers is responsible for protocol conversion, data encryption/decryption, and data compression?

A. Transport layer

B. Presentation layer
C. Data-link layer
D. Network layer

Answer: B

Question No : 4 - (Topic 1)

You are responsible for security at a company that uses a lot of Web applications. You are most concerned about flaws in those applications allowing some attacker to get into your network. What method would be best for finding such flaws?

A. Vulnerability scanning
B. Manual penetration testing
C. Automated penetration testing
D. Code review

Answer: A

Question No : 5 - (Topic 1)

Which of the following representatives of incident response team takes forensic backups of the systems that are the focus of the incident?

A. Lead investigator
B. Information security representative
C. Technical representative
D. Legal representative

Answer: C

Question No : 6 - (Topic 1)

Which of the following statements are true about routers?

Each correct answer represents a complete solution. Choose all that apply.

A. Routers are responsible for making decisions about which of several paths network (orInternet)traffic will follow.
B. Routers do not limit physical broadcast traffic.
C. Routers organize addresses into classes, which are used to determine how to move packets fromone network to another.
D. Routers act as protocol translators and bind dissimilar networks.

Answer: A,C,D

Question No : 7 - (Topic 1)

Which of the following types of attacks cannot be prevented by technical measures only?

A. Brute force
B. Ping flood attack
C. Smurf DoS
D. Social engineering

Answer: D

Question No : 8 - (Topic 1)

You work as a Network Administrator for Tech Perfect Inc. The company requires a secure wireless

network. To provide security, you are configuring ISA Server 2006 as a firewall. While configuring

ISA Server 2006, which of the following is NOT necessary?

A. Defining how ISA Server would cache Web contents
B. Defining ISA Server network configuration
C. Setting up of monitoring on ISA Server
D. Configuration of VPN access

Answer: D

Question No : 9 - (Topic 1)

Which of the following attacks CANNOT be detected by an Intrusion Detection System (IDS)?

Each correct answer represents a complete solution. Choose all that apply.

A. Denial-of-Service (DoS) attack
B. E-mail spoofing
C. Port scan attack
D. Shoulder surfing

Answer: B,D

Question No : 10 - (Topic 1)

Which of the following statements best describes a certification authority?

A. A certification authority is a type of encryption that uses a public key and a private key pair fordata encryption.
B. A certification authority is an entity that issues digital certificates for use by other parties.
C. A certification authority is a technique to authenticate digital documents by using computercryptography.
D. A certification authority is a type of encryption that uses a single key to encrypt and decryp t data.

Answer: B

Question No : 11 - (Topic 1)

You have just set up a wireless network for customers at a coffee shop. Which of the following are good security measures to implement?

Each correct answer represents a complete solution. Choose two.

A. Using WEP encryption
B. Using WPA encryption
C. Not broadcasting SSID
D. MAC filtering the router

Answer: A,B

Question No : 12 - (Topic 1)

Linux traffic monitoring tools are used to monitor and quickly detect faults in the network or a system. Which of the following tools are used to monitor traffic of the Linux operating system?

Each correct answer represents a complete solution. Choose all that apply.

A. PsExec
B. IPTraf
C. MRTG
D. PsLogList
E. Ntop

Answer: B,C,E

Question No : 13 - (Topic 1)

John works as an Office Assistant in DataSoft Inc. He has received an e-mail from duesoft_lotterygroup@us.com with the following message:

The DueSoft Lottery Incorporation

This is to inform you that you have just won a prize of $7,500.00 for this year's Annual Lottery promotion, which was organized by Msn/Yahoo Lottery in conjunction with DueSoft. We collect active online e-mails and select five people every year as our winners through an electronic balloting machine. Please reply within three days of receiving this e-mail with your full details like Name, Address, Sex, Occupation, Age, State, Telephone number, and Country to claim your prize.

If John replies to this e-mail, which of the following attacks may he become vulnerable to?

A. Salami attack
B. Man-in-the-Middle attack
C. Phishing attack
D. DoS attack

Answer: C

Question No : 14 - (Topic 1)

Fill in the blank with the appropriate word ___is software that is a subcategory of malware and refers to unwanted software that performs malicious actions on a user's computer. Some its examples are Trojan, adware, and spyware.

A. Crimeware

Answer: A

Question No : 15 - (Topic 1)

John works as a professional Ethical Hacker. He has been assigned the project of testing the security of www.we-are-secure.com. He is using a tool to crack the wireless encryption keys. The description of the tool is as follows:

It is a Linux-based WLAN WEP cracking tool that recovers encryption keys. It operates by passively monitoring transmissions. It uses Ciphertext Only Attack and captures approximately 5 to 10 million packets to decrypt the WEP keys.

Which of the following tools is John using to crack the wireless encryption keys?

A. AirSnort
B. Kismet
C. PsPasswd
D. Cain

Answer: A

Question No : 16 - (Topic 1)

Which of the following proxy servers is also referred to as transparent proxies or forced proxies?

A. Intercepting proxy server
B. Anonymous proxy server
C. Reverse proxy server
D. Tunneling proxy server

Answer: A

Question No : 17 - (Topic 1)

Which of the following security policies will you implement to keep safe your data when you
connect your Laptop to the office network over IEEE 802.11 WLANs?

Each correct answer represents a complete solution. Choose two.

A. Using a protocol analyzer on your Laptop to monitor for risks.
B. Using an IPSec enabled VPN for remote connectivity.
C. Using portscanner like nmap in your network.
D. Using personal firewall software on your Laptop.

Answer: B,D

Question No : 18 - (Topic 1)

Which of the following is the first computer virus that was used to infect the boot sector of
storage media formatted with the DOS File Allocation Table (FAT) file system?

A. I love you
B. Melissa
C. Tequila
D. Brain

Answer: D

Question No : 19 - (Topic 1)

Which of the following needs to be documented to preserve evidences for presentation in
court?

A. Incident response policy
B. Account lockout policy
C. Separation of duties
D. Chain of custody

Answer: D

Question No : 20 - (Topic 1)

Kerberos is a computer network authentication protocol that allows individuals communicating over a non-secure network to prove their identity to one another in a secure manner. Which of the following statements are true about the Kerberos authentication scheme?

Each correct answer represents a complete solution. Choose all that apply.

A. Kerberos requires continuous availability of a central server.
B. Kerberos builds on Asymmetric key cryptography and requires a trusted third party.
C. Dictionary and brute force attacks on the initial TGS response to a client may reveal the subject'spasswords.
D. Kerberos requires the clocks of the involved hosts to be synchronized.

Answer: A,C,D

Question No : 21 - (Topic 1)

Which of the following is used in asymmetric encryption?

A. Public key and user key
B. SSL
C. Public key and private key
D. NTFS

Answer: C

Question No : 22 - (Topic 1)

Sam, a malicious hacker, targets the electric power grid of Umbrella Inc. and gains access to the electronic control systems. Which of the following types of cybercrime has Sam performed?

A. Cyber defamation
B. Cybertrespass
C. Cyberterrorism
D. Cybertheft

Answer: C

Question No : 23 - (Topic 1)

Maria works as a Desktop Technician for PassGuide Inc. She has received an e-mail from the MN

Compensation Office with the following message:

Dear Sir/Madam,

My name is Edgar Rena, the director of compensation here at the MN Compensation Office in Chicago. We receive so many complaints about fraudulent activities that have been taking place in your region for the past few years. Due to the high volume loss of money, the MN compensation department has had an agreement with the appropriate authority to compensate each victim with a sum of USD$500,000.00.

You were selected among the list of people to be paid this sum. To avoid any imperative mood by intending scammers, your payment has been transmuted into an International bank draft which can be cashed at any local bank in your country.

Please fill the below details and send it to our secretary for your compensation bank draft.

Full name: _____

Address: _____

Tel: _____

Fill & Send to:

Dr. Michael Brown

MN Compensation Office, IL

Tel: +1-866-233-8434

Email: micbrown@live.com

Further instructions shall be given to you by our secretary as soon as you contact him. To avoid losing your compensation, you are requested to pay the sum of $350 for Insurance Premium to our secretary.

Thanks and God bless.

If Maria replies to this mail, which of the following attacks may she become vulnerable to?

A. Phishing attack
B. SYN attack
C. CookieMonster attack
D. Mail bombing

Answer: A

Question No : 24 - (Topic 1)

Victor works as a network administrator for DataSecu Inc. He uses a dual firewall Demilitarized Zone (DMZ) to insulate the rest of the network from the portions that is available to the Internet.

Which of the following security threats may occur if DMZ protocol attacks are performed?

Each correct answer represents a complete solution. Choose all that apply.

A. The attacker can exploit any protocol used to go into the internal network or intranet of thecompany.
B. The attacker can gain access to the Web server in a DMZ and exploit the database.
C. The attacker can perform a Zero Day attack by delivering a malicious payload that is not a part of the intrusion detection/prevention systems guarding the network.
D. The attacker managing to break the first firewall defense can access the internal network without breaking the second firewall if it is different.

Answer: A,B,C

Question No : 25 - (Topic 1)

Which of the following Linux rootkits is installed via stolen SSH keys?

A. Phalanx2
B. Beastkit
C. Adore
D. Linux.Ramen

Answer: A

Question No : 26 - (Topic 1)

Which of the following is a set of exclusive rights granted by a state to an inventor or his assignee for a fixed period of time in exchange for the disclosure of an invention?

A. Snooping
B. Copyright
C. Utility model
D. Patent

Answer: D

Question No : 27 - (Topic 1)

Jason works as a System Administrator for Passguide Inc. The company has a Windows-based network. Sam, an employee of the company, accidentally changes some of the applications and system settings. He complains to Jason that his system is not working properly. To troubleshoot the problem, Jason diagnoses the internals of his computer and observes that some changes have been made in Sam's computer registry. To rectify the issue, Jason has to restore the registry.

Which of the following utilities can Jason use to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

A. Reg.exe
B. Resplendent registrar
C. EventCombMT
D. Regedit.exe

Answer: A,B,D

Question No : 28 - (Topic 1)

Victor works as a professional Ethical Hacker for SecureEnet Inc. He has been assigned a job to test an image, in which some secret information is hidden, using Steganography. Victor performs the following techniques to accomplish the task:

1. Smoothening and decreasing contrast by averaging the pixels of the area where significant

color transitions occurs.

2. Reducing noise by adjusting color and averaging pixel value.

3. Sharpening, Rotating, Resampling, and Softening the image.

Which of the following Steganography attacks is Victor using?

A. Steg-Only Attack
B. Chosen-Stego Attack
C. Active Attacks
D. Stegdetect Attack

Answer: C

Question No : 29 - (Topic 1)

What is the major difference between a *worm* and a *Trojan horse*?

A. A worm is self replicating, while a Trojan horse is not.
B. A worm is a form of malicious program, while a Trojan horse is a utility.
C. A worm spreads via e-mail, while a Trojan horse does not.
D. A Trojan horse is a malicious program, while a worm is an anti-virus software.

Answer: A

Question No : 30 - (Topic 1)

John works as a Network Security Administrator for NetPerfect Inc. The manager of the company has told John that the company's phone bill has increased drastically. John suspects that the company's phone system has been cracked by a malicious hacker. Which attack is used by malicious hackers to crack the phone system?

A. Sequence++ attack
B. Phreaking
C. Man-in-the-middle attack
D. War dialing

Answer: B

Question No : 31 - (Topic 1)

You work as a professional Computer Hacking Forensic Investigator for DataEnet Inc. You want to investigate e-mail information of an employee of the company. The suspected employee is using an online e-mail system such as Hotmail or Yahoo. Which of the following folders on the local computer will you review to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

A. Download folder
B. History folder
C. Temporary Internet Folder
D. Cookies folder

Answer: B,C,D

Question No : 32 - (Topic 1)

John works as a Network Security Professional. He is assigned a project to test the security of www.we-are-secure.com. He is working on the Linux operating system and wants to install an Intrusion Detection System on the We-are-secure server so that he can receive alerts about any hacking attempts. Which of the following tools can John use to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

A. Samhain
B. Tripwire
C. Snort
D. SARA

Answer: A,C

Question No : 33 - (Topic 1)

You manage a Windows Server 2008 server named uCert1 in a domain named PassGuide.com.

uCert1 has the Web Server (IIS) role installed and hosts an intranet Web site named

PassGuideInternal.

You want to ensure that all authentication traffic to the Web site is encrypted securely without the use of SSL. You disable Anonymous Authentication. What else should you do?

A. Enable Windows Authentication and Forms Authentication.
B. Enable Windows Authentication and Digest Authentication.
C. Enable Basic Authentication and Windows Authentication.
D. Enable Digest Authentication and Forms Authentication.

Answer: B

Question No : 34 - (Topic 1)

Which of the following password cracking attacks does not use any software for cracking e-mail passwords?

Each correct answer represents a complete solution. Choose all that apply.

A. Brute force attack
B. Shoulder surfing
C. Social engineering
D. Dictionary attack

Answer: B,C

Question No : 35 - (Topic 1)

You work as a Sales Manager for NetPerfect Inc. The company has a Windows-based network. You have to often send confidential e-mails and make online payments and purchases. You want to protect transmitted information and also to increase the security of e-mail communications. Which of the following programs or services will you use to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

A. Anonymizer
B. John the Ripper
C. THC Hydra
D. Pretty Good Privacy (PGP)

Answer: A,D

Question No : 36 - (Topic 1)

The IT administrator wants to implement a stronger security policy. What are the four most important security priorities for PassGuide Software Systems Pvt. Ltd.? (Click the Exhibit button on the toolbar to see the case study.)

A. Preventing denial-of-service attacks.
B. Providing two-factor authentication.
C. Ensuring secure authentication.
D. Protecting employee data on portable computers.
E. Implementing Certificate services on Texas office.
F. Preventing unauthorized network access.
G. Providing secure communications between the overseas office and the headquarters.
H. Providing secure communications between Washington and the headquarters office.

Answer: C,D,F,G

Question No : 37 - (Topic 1)

According to the Internet Crime Report 2009, which of the following complaint categories is on the top?

A. Identity theft
B. Advanced fee fraud
C. Non-delivered merchandise/payment
D. FBI scams

Answer: D

Question No : 38 - (Topic 1)

Maria works as the Chief Security Officer for PassGuide Inc. She wants to send secret messages to the CEO of the company. To secure these messages, she uses a technique of hiding a secret message within an ordinary message. The technique provides 'security through obscurity'. What technique is Maria using?

A. Steganography
B. Public-key cryptography
C. Encryption
D. RSA algorithm

Answer: A

Question No : 39 - (Topic 1)

Which of the following is a documentation of guidelines that computer forensics experts use to handle evidences?

A. Incident response policy
B. Chain of custody
C. Chain of evidence
D. Evidence access policy

Answer: B

Question No : 40 - (Topic 1)

Peter works as a System Administrator for TechSoft Inc. The company uses Linux-based systems.

Peter's manager suspects that someone is trying to log in to his computer in his absence. Which of the following commands will Peter run to show the last unsuccessful login attempts, as well as the users who have last logged in to the manager's system?

Each correct answer represents a complete solution. Choose two.

A. rwho -a
B. lastb
C. last
D. pwd

Answer: B,C

Question No : 41 - (Topic 1)

John works as a Security Administrator for NetPerfect Inc. The company uses Windows-based

systems. A project has been assigned to John to track malicious hackers and to strengthen the company's security system. John configures a computer system to trick malicious hackers into thinking that it is the company's main server, which in fact is a decoy system to track hackers.

Which system is John using to track the malicious hackers?

A. Honeypot
B. Intrusion Detection System (IDS)
C. Bastion host
D. Honeytokens

Answer: A

Question No : 42 - (Topic 1)

Which of the following can be used to perform session hijacking?

Each correct answer represents a complete solution. Choose all that apply.

A. ARP spoofing
B. Cross-site scripting
C. Session fixation
D. Session sidejacking

Answer: B,C,D

Question No : 43 - (Topic 1)

In which of the following techniques does an attacker take network traffic coming towards a host at one port and forward it from that host to another host?

A. Snooping
B. UDP port scanning
C. Port redirection
D. Firewalking

Answer: C

Question No : 44 - (Topic 1)

Which of the following is used to authenticate asymmetric keys?

A. Digital signature
B. MAC Address
C. Password
D. Demilitarized zone (DMZ)

Answer: A

Question No : 45 - (Topic 1)

Which of the following programs is used for bypassing normal authentication for securing remote access to a computer?

A. Worm
B. Adware
C. Backdoor
D. Spyware

Answer: C

Question No : 46 - (Topic 1)

Which of the following is a name, symbol, or slogan with which a product is identified?

A. Copyright
B. Trademark
C. Trade secret
D. Patent

Answer: B

Question No : 47 - (Topic 1)

John works as a professional Ethical Hacker. He has been assigned the project of testing the security of www.we-are-secure.com. He has successfully completed the following steps of the preattack phase:

·Information gathering

·Determining network range

·Identifying active machines

·Finding open ports and applications

·OS fingerprinting

·Fingerprinting services

Now John wants to perform network mapping of the We-are-secure network. Which of the following tools can he use to accomplish his task?

Each correct answer represents a complete solution. Choose all that apply.

A. Traceroute
B. NeoTrace
C. Cheops
D. Ettercap

Answer: A,B,C

Question No : 48 - (Topic 1)

John, a malicious hacker, forces a router to stop forwarding packets by flooding it with many open connections simultaneously so that all hosts behind it are effectively disabled. Which of the following attacks is John performing?

A. Replay attack
B. DoS attack
C. ARP spoofing
D. Rainbow attack

Answer: B

Question No : 49 - (Topic 1)

Which of the following statements are correct about spoofing and session hijacking?

Each correct answer represents a complete solution. Choose all that apply.

A. Spoofing is an attack in which an attacker can spoof the IP address or other identity of the targetand the valid user cannot be active.
B. Session hijacking is an attack in which an attacker takes over the session, and the valid user'ssession is disconnected.
C. Session hijacking is an attack in which an attacker takes over the session, and the valid user'ssession is not disconnected.
D. Spoofing is an attack in which an attacker can spoof the IP address or other identity of the targetbut the valid user can be active.

Answer: C,D

Question No : 50 - (Topic 1)

In which of the following DoS attacks does an attacker send an ICMP packet larger than 65,536 bytes to the target system?

A. Fraggle
B. Jolt
C. Teardrop
D. Ping of death

Answer: D

Question No : 51 - (Topic 1)

John works as a Professional Ethical Hacker for NetPerfect Inc. The company has a Linux-based network. All client computers are running on Red Hat 7.0 Linux. The Sales Manager of the company complains to John that his system contains an unknown package named as tar.gz and his documents are exploited. To resolve the problem, John uses a Port scanner to enquire about the open ports and finds out that the HTTP server service port on

27374 is open. He suspects that the other computers on the network are also facing the same problem. John discovers that a malicious application is using the synscan tool to randomly generate IP addresses.

Which of the following worms has attacked the computer?

A. Code red
B. Ramen
C. LoveLetter
D. Nimda

Answer: B

Question No : 52 - (Topic 1)

Which two technologies should research groups use for secure VPN access while traveling?

(Click the Exhibit button on the toolbar to see the case study.)

Each correct answer represents a complete solution. Choose two.

A. SSL
B. Kerberos authentication
C. PPTP
D. Smart cards
E. Encrypting File System (EFS)

Answer: C,D

Question No : 53 - (Topic 1)

Victor wants to use Wireless Zero Configuration (WZC) to establish a wireless network connection using his computer running on Windows XP operating system. Which of the following are the most likely threats to his computer?

Each correct answer represents a complete solution. Choose two.

A. Information of probing for networks can be viewed using a wireless analyzer and may be used to gain access.

B. Attacker can use the Ping Flood DoS attack if WZC is used.
C. Attacker by creating a fake wireless network with high power antenna cause Victor's computer to associate with his network to gain access.
D. It will not allow the configuration of encryption and MAC filtering. Sending information is not secure on wireless network.

Answer: A,C

Question No : 54 - (Topic 1)

Which of the following uses public key cryptography to encrypt the contents of files?

A. EFS
B. DFS
C. NTFS
D. RFS

Answer: A

Question No : 55 - (Topic 1)

Which of the following softwares is used to perform constant monitoring of the network infrastructure?

A. Logdog
B. THCHydra
C. IPSentry
D. Cain

Answer: C

Question No : 56 - (Topic 1)

You work as a Network Administrator for Tech Perfect Inc. The company has a Windows Server 2008 network environment. The network is configured as a Windows Active Directory-based single forest domain-based network. The company has recently provided fifty laptops to its sales team members. You are required to configure an 802.11 *wireless* network for the laptops. The sales team members must be able to use their data placed at

a server in a cabled network. The planned network should be able to handle the threat of unauthorized access and data interception by an unauthorized user. You are also required to prevent the sales team members from communicating directly to one another. Which of the following actions will you perform to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

A. Implement the open system authentication for the wireless network.
B. Implement the IEEE 802.1X authentication for the wireless network.
C. Configure the wireless network to use WEP encryption for the data transmitted over a wireless network.
D. Using group policies, configure the network to allow the wireless computers to connect to the infrastructure networks only.
E. Using group policies, configure the network to allow the wireless computers to connect to the ad hoc networks only.

Answer: B,C,D

Question No : 57 - (Topic 1)

Which of the following statements are true about session hijacking?

Each correct answer represents a complete solution. Choose all that apply.

A. TCP session hijacking is when a hacker takes over a TCP session between two machines.
B. It is used to slow the working of victim's network resources.
C. Use of a long random number or string as the session key reduces session hijacking.
D. It is the exploitation of a valid computer session to gain unauthorized access to informationor services in a computer system.

Answer: A,C,D

Question No : 58 - (Topic 1)

Which of the following Linux rootkits allows attackers to hide files, processes, and network connections?

Each correct answer represents a complete solution. Choose all that apply.

A. Phalanx2
B. Adore
C. Knark
D. Beastkit

Answer: B,C

Question No : 59 - (Topic 1)

Who among the following are security experts who specialize in penetration testing and other testing methodologies to ensure that their company's information systems are secure?

Each correct answer represents a complete solution. Choose all that apply.

A. Black hat hackers
B. White hat hackers
C. Script Kiddies
D. Ethical hackers

Answer: B,D

Question No : 60 - (Topic 1)

You work as a Network Administrator for ABC Inc. The company uses a secure wireless network.

John complains to you that his computer is not working properly. What type of security audit do you need to conduct to resolve the problem?

A. Independent audit
B. Operational audit
C. Non-operational audit
D. Dependent audit

Answer: A

Question No : 61 - (Topic 1)

Jason, a cybercriminal, sells illegal articles on the Internet. Which of the following activities is Jason involved in?

A. Cyberstalking
B. Cyberterrorism
C. Cybertrespass
D. Internet pharmacies

Answer: D

Question No : 62 - (Topic 1)

In a complex network, Router transfers data packets by observing some form of parameters or metrics provided in the routing table. Which of the following metrics is NOT included in the routing table?

A. Bandwidth
B. Delay
C. Load
D. Frequency

Answer: D

Question No : 63 - (Topic 1)

A firewall is a combination of hardware and software, used to provide security to a network. It is used to protect an internal network or intranet against unauthorized access from the Internet or other outside networks. It restricts inbound and outbound access and can analyze all traffic between an internal network and the Internet. Users can configure a firewall to pass or block packets from specific IP addresses and ports. Which of the following tools works as a firewall for the Linux 2.4 kernel?

A. Stunnel
B. IPTables
C. OpenSSH
D. IPChains

Answer: B

Question No : 64 - (Topic 1)

Which of the following terms is used for the process of securing a system or a device on a network infrastructure?

A. Hardening
B. Sanitization
C. Authentication
D. Cryptography

Answer: A

Question No : 65 - (Topic 1)

Fill in the blank with the command to complete the statement below. Do not enter the full path of the command.

The _____ command is used to remove the print jobs that have been queued for printing by using a secure connection.

A. lprm -E

Answer: A

Question No : 66 - (Topic 1)

Which of the following Intrusion Detection Systems (IDS) is used to monitor rogue access points and the use of wireless attack tools?

A. Snort 2.1.0
B. WIDS
C. NFR security
D. LogIDS 1.0

Answer: B

Question No : 67 - (Topic 1)

John works as a professional Ethical Hacker. He has been assigned the project of testing the security of www.we-are-secure.com. John notices that the We-are-secure network is vulnerable to a man-in-the-middle attack since the key exchange process of the cryptographic algorithm it is using does not authenticate participants. Which of the following cryptographic algorithms is being used by the We-are-secure server?

A. RSA
B. Twofish
C. Blowfish
D. Diffie-Hellman

Answer: D

Question No : 68 - (Topic 1)

Andrew, a bachelor student of Faulkner University, creates a gmail account. He uses 'Faulkner' as the password for the gmail account. After a few days, he starts receiving a lot of e-mails stating that his gmail account has been hacked. He also finds that some of his important mails have been deleted by someone. Which of the following methods has the attacker used to crack Andrew's password?

Each correct answer represents a complete solution. Choose all that apply.

A. Zero-day attack
B. Social engineering
C. Rainbow attack
D. Buffer-overflow attack
E. Brute force attack
F. Dictionary-based attack
G. Denial-of-service (DoS) attack
H. Password guessing

Answer: B,C,E,F,G,H

Question No : 69 - (Topic 1)

Which of the following software helps in protecting the computer against pop-ups, slow performance, and security threats caused by spyware and other unwanted software?

Each correct answer represents a complete solution. Choose all that apply.

A. BitDefender
B. Windows Defender
C. John the Ripper
D. THC Hydra

Answer: A,B

Question No : 70 - (Topic 1)

A digital signature is a type of public key cryptography. Which of the following statements are true about digital signatures?

Each correct answer represents a complete solution. Choose all that apply.

A. In order to digitally sign an electronic record, a person must use his/her public key.
B. In order to verify a digital signature, the signer's private key must be used.
C. In order to verify a digital signature, the signer's public key must be used.
D. In order to digitally sign an electronic record, a person must use his/her private key.

Answer: C,D

Question No : 71 - (Topic 1)

Andrew works as a Forensic Investigator for Passguide Inc. The company has a Windows-based environment. The company's employees use Microsoft Outlook Express as their e-mail client program. E-mails of some employees have been deleted due to a virus attack on the network.

Andrew is therefore assigned the task to recover the deleted mails. Which of the following tools can Andrew use to accomplish the task?

Each correct answer represents a complete solution. Choose two.

A. FINALeMAIL
B. eMailTrackerPro
C. EventCombMT
D. R-mail

Answer: A,D

Question No : 72 - (Topic 1)

Which of the following Incident handling process phases is responsible for defining rules, collaborating human workforce, creating a back-up plan, and testing the plans for an enterprise?

A. Eradication phase
B. Preparation phase
C. Recovery phase
D. Identification phase
E. Containment phase

Answer: B

Question No : 73 - (Topic 1)

Which of the following components are usually found in an *Intrusion detection system (IDS)* ?

Each correct answer represents a complete solution. Choose two.

A. Modem
B. Console
C. Sensor
D. Gateway
E. Firewall

Answer: B,C

Question No : 74 - (Topic 1)

Which of the following honeypots is a low-interaction honeypot and is used by companies or corporations for capturing limited information about malicious hackers?

A. Production honeypot
B. Research honeypot
C. Honeynet
D. Honeyfarm

Answer: A

Question No : 75 - (Topic 1)

You work as a Network Administrator for Tech Perfect Inc. The company has a Windows Active Directory-based single domain single forest network. The functional level of the forest is Windows Server 2003. The company has recently provided fifty laptops to its sales team members. You are required to configure an 802.11 *wireless* network for the laptops. The sales team members must be able to use their data placed at a server in a cabled network. The planned network should be able to handle the threat of unauthorized access and data interception by an unauthorized user.

You are also required to prevent the sales team members from communicating directly to one another. Which of the following actions will you take to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

A. Configure the wireless network to use WEP encryption for the data transmitted over a wireless network.
B. Using group policies, configure the network to allow the wireless computers to connect to the ad hoc networks only.
C. Implement the open system authentication for the wireless network.
D. Using group policies, configure the network to allow the wireless computers to connect to the infrastructure networks only.
E. Implement the IEEE 802.1X authentication for the wireless network.

Answer: A,D,E

Question No : 76 - (Topic 1)

Which of the following statements are TRUE about Demilitarized zone (DMZ)?

Each correct answer represents a complete solution. Choose all that apply.

A. The purpose of a DMZ is to add an additional layer of security to the Local Area Network of an organization.
B. In a DMZ configuration, most computers on the LAN run behind a firewall connected to a public network like the Internet.
C. Hosts in the DMZ have full connectivity to specific hosts in the internal network.
D. Demilitarized zone is a physical or logical sub-network that contains and exposes

external services of an organization to a larger un-trusted network.

Answer: A,B,D

Question No : 77 - (Topic 1)

In which of the following complaint types does a fraudulent transaction take place?

A. Overpayment Fraud
B. FBI scams
C. Auction fraud
D. Computer damage

Answer: C

Question No : 78 - (Topic 1)

Which of the following malicious software is used by several advertising websites for downloading and displaying advertisements in the Web browser without user permission?

A. Worm
B. Blended threat
C. Adware
D. Trojan horse

Answer: C

Question No : 79 - (Topic 1)

Which of the following parameters are required to be followed on receiving a suspicious mail according to the Department of Justice?

Each correct answer represents a part of the solution. Choose all that apply.

A. Call
B. Look
C. Identify

D. Stop

Answer: A,B,D

Question No : 80 - (Topic 1)

Andrew works as a System Administrator for NetPerfect Inc. All client computers on the network run on Mac OS X. The Sales Manager of the company complains that his MacBook is not able to boot. Andrew wants to check the booting process. He suspects that an error persists in the bootloader of Mac OS X. Which of the following is the default bootloader on Mac OS X that he should use to resolve the issue?

A. LILO
B. GRUB
C. NT Loader
D. BootX

Answer: D

Question No : 81 - (Topic 1)

An Anti-Virus software is used to prevent, detect, and remove malware from a system, including computer viruses, worms, and Trojan horses. Which of the following companies are the providers of Anti-virus softwares?

Each correct answer represents a complete solution. Choose all that apply.

A. Symantec Corporation
B. F-Secure Corporation
C. AVG Technologies
D. Kaspersky Lab
E. McAfee Inc.

Answer: A,B,C,D,E

Question No : 82 - (Topic 1)

Burp Suite is a Java application for attacking web applications. This tool includes a proxy

server, a spider, an intruder, and a repeater. Which of the following can be used to perform stress testing?

A. Repeater
B. Spider
C. Intruder
D. Proxy Server

Answer: A

Question No : 83 - (Topic 1)

Jason, a Malicious Hacker, is a student of Baker university. He wants to perform remote hacking on the server of DataSoft Inc. to hone his hacking skills. The company has a Windows-based network. Jason successfully enters the target system remotely by using the advantage of vulnerability. He places a Trojan to maintain future access and then disconnects the remote session.

The employees of the company complain to Mark, who works as a Professional Ethical Hacker for DataSoft Inc., that some computers are very slow. Mark diagnoses the network and finds that some irrelevant log files and signs of Trojans are present on the computers. He suspects that a malicious hacker has accessed the network. Mark takes the help from Forensic Investigators and catches Jason. Which of the following mistakes made by Jason helped the Forensic Investigators catch him?

A. Jason did not perform a vulnerability assessment.
B. Jason did not perform port scanning.
C. Jason did not perform foot printing.
D. Jason did not perform OS fingerprinting.
E. Jason did not perform covering tracks.

Answer: E

Question No : 84 - (Topic 1)

Maria works as a professional Ethical Hacker. She recently has been assigned a project to test the security of www.we-are-secure.com. The company has provided the following information about the infrastructure of its network:

·Network diagrams of the we-are-secure infrastructure

·Source code of the security tools

· IP addressing information of the we-are-secure network

Which of the following testing methodologies is we-are-secure.com using to test the security of its network?

A. Whitebox
B. Blackbox
C. Graybox
D. Alpha testing

Answer: A

Question No : 85 - (Topic 1)

Which of the following types of firewall functions by creating two different communications, one between the client and the firewall, and the other between the firewall and the end server?

A. Stateful firewall
B. Packet filter firewall
C. Proxy-based firewall
D. Endian firewall

Answer: C

Question No : 86 - (Topic 1)

Which of the following layers of the OSI model provides non-repudiation services?

A. The application layer
B. The physical layer
C. The data-link layer
D. The presentation layer

Answer: A

Question No : 87 - (Topic 1)

Adam works as a Security Analyst for Umbrella Inc. He is retrieving large amount of log data from various resources such as Apache log files, IIS logs, streaming servers, and some FTP servers. He is facing difficulty in analyzing the logs that he has retrieved. To solve this problem, Adam decides to use AWStats application. Which of the following statements are true about AWStats?

Each correct answer represents a complete solution. Choose all that apply.

A. It generates advanced Web, streaming, mail server statistics graphically.
B. It can analyze log files server tools such as Apache log files, WebStar, IIS and other Web, proxy, and some ftp servers.
C. It can work with all Web hosting providers, which allow Perl, CGI and log access.
D. It works only as a CGI and shows all possible information contained in log.

Answer: A,B,C

Question No : 88 - (Topic 1)

Which of the following two cryptography methods are used by NTFS Encrypting File System (EFS) to encrypt the data stored on a disk on a file-by-file basis?

A. Twofish
B. Digital certificates
C. Public key
D. RSA

Answer: B,C

Question No : 89 - (Topic 1)

You work as a Network Administrator for Infonet Inc. The company uses *Wired Equivalent Privacy (WEP)* for wireless security. Who among the following can authenticate from the access point of the network?

A. Only users within the company.
B. Only users with the correct WEP key.
C. Only the administrator.

D. Anyone can authenticate.

Answer: B

Question No : 90 - (Topic 1)

Peter works as a professional Computer Hacking Forensic Investigator for eLaw-Suit law firm. He is working on a case of a cyber crime. Peter knows that the good investigative report should not only communicate the relevant facts, but also present expert opinion. This report should not include the cases in which the expert acted as a lay witness. Which of the following type of witnesses is a lay witness?

A. One who can give a firsthand account of something seen, heard, or experienced.
B. One with special knowledge of the subject about which he or she is testifying.
C. One who observes an event.
D. One who is not qualified as an expert witness.

Answer: D

Question No : 91 - (Topic 1)

Which of the following tools provides a great solution for auditing and testing the recognition and response capabilities of the corporate security defenses?

A. Traffic IQ Professional
B. IPSentry
C. Burp Suite
D. F-Secure

Answer: A

Question No : 92 - (Topic 1)

John works as a professional Ethical Hacker. He has been assigned the project of testing the security of www.we-are-secure.com. He is using dumpster diving to gather information about Weare- secure, Inc. In which of the following steps of malicious hacking does **dumpster diving** come under?

A. Gaining access
B. Scanning
C. Maintaining access
D. Reconnaissance

Answer: D

Question No : 93 - (Topic 1)

Which of the following software can be used to protect a computer system from external threats (viruses, worms, malware, or Trojans) and malicious attacks?

Each correct answer represents a part of the solution. Choose all that apply.

A. Employee monitoring software
B. Burp Suite
C. Antivirus
D. Firewall

Answer: C,D

Question No : 94 - (Topic 1)

You want to rename a file **foo** to the file **bar** and move the file bar to the /tmp folder. Which of the following commands will you use to accomplish the task?

A. mv bar /temp/foo
B. ren foo /tmp/bar
C. mv foo /tmp/bar
D. ren bar /tml/foo

Answer: C

Topic 2, Volume B

Question No : 95 - (Topic 2)

Brutus is a password cracking tool that can be used to crack the following authentications:

·HTTP (Basic Authentication)

·HTTP (HTML Form/CGI)

·POP3 (Post Office Protocol v3)

·FTP (File Transfer Protocol)

·SMB (Server Message Block)

·Telnet

Which of the following attacks can be performed by Brutus for password cracking?

Each correct answer represents a complete solution. Choose all that apply.

A. Hybrid attack
B. Dictionary attack
C. Brute force attack
D. Man-in-the-middle attack
E. Replay attack

Answer: A,B,C

Question No : 96 - (Topic 2)

Adam works as a Computer Hacking Forensic Investigator for a garment company in the United States. A project has been assigned to him to investigate a case of a disloyal employee who is suspected of stealing design of the garments, which belongs to the company and selling those garments of the same design under different brand name. Adam investigated that the company does not have any policy related to the copy of design of the garments. He also investigated that the trademark under which the employee is selling the garments is almost identical to the original trademark of the company. On the grounds of which of the following laws can the employee be prosecuted?

A. Copyright law
B. Cyber law
C. Espionage law
D. Trademark law

Answer: D

Question No : 97 - (Topic 2)

Which of the following is a network worm that exploits the RPC sub-system vulnerability present in the Microsoft Windows operating system?

A. WMA/TrojanDownloader.GetCodec
B. Win32/PSW.OnLineGames
C. Win32/Agent
D. Win32/Conflicker

Answer: D

Question No : 98 - (Topic 2)

Which of the following cryptographic system services ensures that information will not be disclosed to any unauthorized person on a local network?

A. Confidentiality
B. Authentication
C. Integrity
D. Non-repudiation

Answer: A

Question No : 99 - (Topic 2)

John works as a professional Ethical Hacker. He is assigned a project to test the security of www.we-are-secure.com. He is working on the Linux operating system. He wants to sniff the weare- secure network and intercept a conversation between two employees of the company through session hijacking. Which of the following tools will John use to accomplish the task?

A. Ethercap
B. Tripwire
C. IPChains
D. Hunt

Answer: D

Question No : 100 - (Topic 2)

Adam works as a Security Analyst for Umbrella Inc. He is retrieving large amount of log data from syslog servers and network devices such as Router and switches. He is facing difficulty in analyzing the logs that he has retrieved. To solve this problem, Adam decides to use software called Sawmill. Which of the following statements are true about Sawmill?

Each correct answer represents a complete solution. Choose all that apply.

A. It is used to analyze any device or software package, which produces a log file such as Web servers, network devices (switches & routers etc.), syslog servers etc.
B. It incorporates real-time reporting and real-time alerting.
C. It comes only as a software package for user deployment.
D. It is a software package for the statistical analysis and reporting of log files.

Answer: A,B,D

Question No : 101 - (Topic 2)

Peter, a malicious hacker, obtains e-mail addresses by harvesting them from postings, blogs, DNS listings, and Web pages. He then sends large number of **unsolicited commercial e-mail (UCE)** messages on these addresses. Which of the following e-mail crimes is Peter committing?

A. E-mail Spam
B. E-mail spoofing
C. E-mail bombing
D. E-mail Storm

Answer: A

Question No : 102 - (Topic 2)

You work as a Desktop Technician for Umbrella Inc. The company has a Windows-based network.

You receive an e-mail from the network administrator's e-mail ID asking you to provide your password so that he can make changes to your profile. You suspect that someone is trying to hack your password after you have confirmed that the network administrator did not send any such type of e-mail. Which of the following types of attacks have been executed?

Each correct answer represents a part of the solution. Choose all that apply.

A. Buffer-overflow attack
B. Social engineering
C. Zero-day attack
D. E-mail spoofing

Answer: B,D

Question No : 103 - (Topic 2)

You work as a Network Security Administrator for NetPerfect Inc. The company has a
Windowsbased network. You are incharge of the data and network security of the
company. While performing a threat log analysis, you observe that one of the database
administrators is pilfering confidential data. What type of threat is this?

A. Malware
B. External threat
C. Internal threat
D. Zombie

Answer: C

Question No : 104 - (Topic 2)

You work as a professional Ethical Hacker. You are assigned a project to perform blackbox
testing of the security of www.we-are-secure.com. Now you want to perform banner
grabbing to retrieve information about the Webserver being used by we-are-secure. Which
of the following tools can you use to accomplish the task?

A. Wget
B. WinSSLMiM
C. Whisker
D. httprint

Answer: D

Question No : 105 - (Topic 2)
