

Microsoft

Exam MB6-890

Microsoft Dynamics AX Development Introduction

Version: 8.0

[Total Questions: 92]

Topic break down

Topic	No. of Questions
Topic 1: Exam Pool A	49
Topic 2: Exam Pool B	43

Topic 1, Exam Pool A

Question No : 1 - (Topic 1)

You are working in a Visual Studio development environment and want to call a class to update some records. Which type of menu item should you use?

- A. Output
- B. Action
- C. Auto
- D. Display

Answer: B

Question No : 2 - (Topic 1)

You are required to configure a Microsoft Dynamics AX production environment for your customer.

You need to configure the Dynamics AX server as part of the overall installation and configuration.

Which two components can be used to deploy the server? Each correct answer presents a complete solution.

- A. Database
- B. Azure Infrastructure as a Service (IaaS) Virtual Machines
- C. Windows PowerShell Commands
- D. Internet Information Services (IIS) web application

Answer: A,B

Question No : 3 - (Topic 1)

A relationship is defined between two tables named CustTable and CustGroup. Each record in CustTable references a record in CustGroup.

You need to set up delete actions to ensure that records in CustGroup can only be deleted if there are no CustTable records that reference or relate to the record.

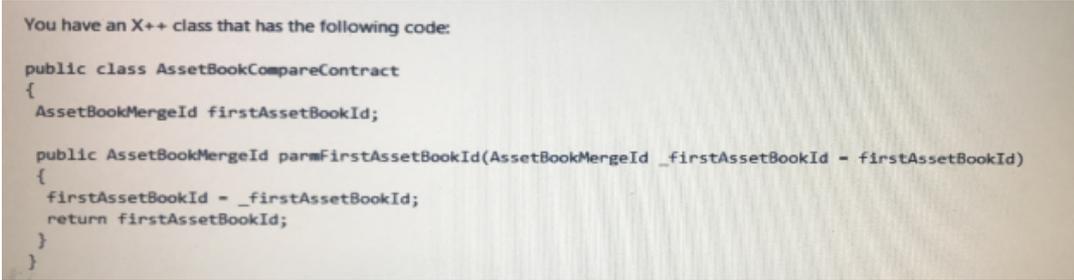

Which values for the On Delete property for the relation should you specify?

- A. None
- B. Cascade + Restricted
- C. Restricted
- D. Cascade

Answer: D

Question No : 4 - (Topic 1)

You have an X++ class that has the following code:

```
You have an X++ class that has the following code:  
  
public class AssetBookCompareContract  
{  
    AssetBookMergeId firstAssetBookId;  
  
    public AssetBookMergeId parmFirstAssetBookId(AssetBookMergeId _firstAssetBookId = firstAssetBookId)  
    {  
        firstAssetBookId = _firstAssetBookId;  
        return firstAssetBookId;  
    }  
}
```

You are writing a static method. You have an object of AssetBookCompareContract named assetBookCompareContractObj that is initialized within this method.

You need to print the current value of the firstAssetBookId variable from the assetBookCompareContractObj object.

Which piece of code should you use to achieve this goal?

- A. irvFo(assetBookCompareContractObj : :flrstAssetBookId);
- B. info(assetBookCompareContractObj.f lrstAssetBookId);
- C. info(assetBookCompareContractObj.parmFirstAssetBookId(""));
- D. info(assetBookCompareContractObj.parmFirstAssel:BookId());

Answer: D

Question No : 5 - (Topic 1)

You have a table named CustTable. which has the following three fields: AccountNum, Currency, and CustGroup. You need to wnte X++ code to insert a record into CustTable and set the values of the three fields as follows:

AccountNum = "5000-

Currency = "USD"

CustGroup="30"

Which two code segments can you use to achieve this goal? Each correct answer presents a complete solution.

A)

```
CustTable custTable;  
custTable.AccountNum = "5000";  
custTable.Currency = "USD";  
custTable.CustGroup = "30";  
custTable.update();
```

B)

```
CustTable custTable;  
custTable.AccountNum = "5000";  
custTable.Currency = "USD";  
custTable.CustGroup = "30";  
custTable.doInsert();
```

C)

```
ttsbegin;  
CustTable custTable;  
custTable.AccountNum = "5000";  
custTable.Currency = "USD";  
custTable.CustGroup = "30";  
ttscommit;
```

D)

```
CustTable custTable;  
custTable.AccountNum = "5000";  
custTable.Currency = "USD";  
custTable.CustGroup = "30";
```

- A. Option A
- B. Option B
- C. Option D
- D. Option D

Answer: C,D

Question No : 6 - (Topic 1)

You plan to create two tables Table1 and Table2. Both tables will have a field of type string that has a length of 15 and is named Customer Number. The tables will have a relation on the Customer Number field.

You need to ensure that the string length of Customer Number is identical in both tables. The solution must ensure that if any relations on the Customer Number field are added to other tables, the additional tables will have the same string length for Customer Number.

What should you use?

- A. an index
- B. a class
- C. an extended data type
- D. a base enumeration

Answer: A

Question No : 7 - (Topic 1)

You have the following X++ statement

```
Int variableA, variableB;  
  
Try  
{  
    variableA = 5;  
    variableB = 20;  
    variableB -= variableA;  
  
    if(variableB > variableA)  
    {  
        throw error("An error has occurred.");  
        error("VariableB cannot be less than variableA");  
    }  
}  
  
Catch (Exception::Error)  
{  
    error("Process was aborted");  
}
```

What is the output of the statement?

- A.**
An error has occurred.
VariableB cannot be less than variableA.
- B.**
An error has occurred.
Process was aborted.
- C.**
An error has occurred.
VariableB cannot be less than variableA.
- D.**
VariableB cannot be less than variableA.
Process was aborted.

Answer: B

Question No : 8 - (Topic 1)

You want to have a form where you can display an image in a fast tab. Which type of sub-pattern should you apply to the fast tab?

- A.** Horizontal fields and Button group

- B. Section tiles
- C. Custom filters
- D. Image preview

Answer: C

Question No : 9 - (Topic 1)

You have tables named Table1 and Table2. The tables have a relation to each other. You need to display data from both of the tables in a form. How should you create the data source for the form?

- A. Add both of the tables into a perspective, and use the perspective as the data source.
- B. Create a new table named Table3 that has a relation to Table1 and to Table2, and use Table3 as the data source.
- C. Add both of the tables into a query, and use the query as the data source.
- D. Add both of the tables into a map, and use the map as the data source.

Answer: C

Question No : 10 - (Topic 1)

You need to write an expression to calculate the compound interest that a bank needs

The formula for compound interest after one period is as follows:

$$I = (P * (1 + R)) - P$$

Where

I = Compound interest

P = Principal that was invested

R = Rate of interest

after one period.

Which X++ expression is equivalent to the formula above using operator precedence in X++?

- A. $I = P * 1 + R - P$
- B. $I = P * (1 + R - P)$

- C. $I = P \cdot (1 + R) - P$
- D. $I = (P \cdot 1) + (R - P)$

Answer: C

Question No : 11 - (Topic 1)

What are three menu item types that are available within Microsoft Dynamics AX? Each correct answer presents a complete solution.

- A. Action
- B. Normal
- C. Output
- D. View
- E. Display

Answer: A,C,E

Question No : 12 - (Topic 1)

You are using the Visual Studio development environment to perform a customization for your client. You create a custom model named MyCustomModel with extended reference models.

You need to change the dependency information for the current model.

Which action should you perform in the Microsoft Dynamics AX menu?

- A. Point to the project and then click Add Reference.
- B. Point to Model Management and then click Update Model Parameters.
- C. Point to Model Management and then click Viewing Package Dependencies.
- D. Point to Model Management and then click Build Model.

Answer: A

Question No : 13 - (Topic 1)

You have two Extended Data Types (EDTs) defined in Microsoft Dynamics AX.

The first EDT is named ExternalAccount. It is of type string and has a StringSize of 20.

The second EDT is named CustVendAC It extends from the ExternalAccount EDT.

Which three statements are true about the CustVendAC EDT? Each correct answer presents a complete solution.

- A. The DisplayLength property can be different from that of ExternalAccount EDT.
- B. The StringSize property can be different from that of ExternalAccount EDT.
- C. The ChangeCase property can be different from that of ExternalAccount EDT.
- D. The Adjustment property can be different from that of ExternalAccount EDT.
- E. The Label property can be different from that of ExternalAccount EDT.

Answer: A,C,E

Question No : 14 - (Topic 1)

You need to verify the properties related to a specific table in the AOT, and you do not have a project The properties pane is already open in Visual Studio.

Which component do you need to use to select the table in order to see the properties?

- A. Application Explorer
- B. Object Browser
- C. Solution Explorer
- D. Code Definition Window

Answer: D

Question No : 15 - (Topic 1)

Which information does the Microsoft Dynamics AX development model contain?

- A. the OLTP database
- B. an element's metadata and source code
- C. an element's metadata only
- D. an elements source code only

Answer: D

Question No : 16 - (Topic 1)

You are developing a solution that stores purchase orders in Microsoft Dynamics AX. Each purchase order can contain multiple purchase order lines. A purchase order line can only be part of one purchase order.

You create two tables, named PurchTable and PurchLine. to model the entities. PurchTable will store purchase orders, and PurchLine will store information about the purchase order lines.

Which relation should you specify between the tables?

- A. a foreign key relation on PurchLine to PurchTable
- B. a field fixed relation
- C. a related field fixed relation
- D. a foreign key relation on PurchTable to PurchLine

Answer: A

Question No : 17 - (Topic 1)

You need to describe the current structure of Microsoft Dynamics AX security roles.

Which three statements are accurate regarding these roles? Each correct answer presents a complete solution.

- A. Permissions can be edited from the Security Configuration form.
- B. Roles are arranged by hierarchy.
- C. Roles are segregated.
- D. Roles are defined one time for all organizations.
- E. Roles can be associated with human resource positions and automatically assigned.

Answer: B,C,D

Question No : 18 - (Topic 1)

You need to determine the output of the following code:

```
int i = 1;
int j = 2;
do
{
    j = i * i;
    i = i + j;
}
while(i < j ? j >= 4 : i <= 4 );

info (strFmt("%1 %2", i, j));
```

What is the output in the Infolog after running the code?

- A. 2 1
- B. 6 4
- C. 12 9
- D. 20 16

Answer: B

Question No : 19 - (Topic 1)

You need to present the advantages of label files to your project team.

Which three attributes of label files should you mention? Each correct answer presents part of the solution.

- A. supports multiple language formats
- B. creates reusable content that can be updated centrally
- C. serves as a centralized database of all labels
- D. restricts labels to a finite list of those available
- E. hard codes the string answers within code, without reference

Answer: A,B

Question No : 20 - (Topic 1)

You have an array of integers with 10 elements.

You need to write C++ code to initialize this array with the values of 1 to 10, with the first element being 1, the second element 2, the last element 10.

Which code segment should you use to achieve this goal?

A)

```
int i[10];
int j;

for (j=1; j<11;j++)
{
i[j] = j;
}
```

B)

```
int i[10];
int j;

for (j=0; j<10;j++)
{
i[j] = j+1;
}
```

C)

```
int i[10];
int j;

for (j=1; j==11;j++)
{
i[j] = j;
}
```

D)

```
for (j=0; j==10;j++)  
{  
i[j] = j+1;  
}
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: D

Question No : 21 - (Topic 1)

You need to determine the output of the following code:Which X++ code segment should you use to achieve this goal?

```
int i = 10;  
str output = "A";  
switch(i)  
{  
  
    case 10:  
        output = "B";  
        i = i + 20;  
    case 20:  
        output = "C";  
        i = i + 10;  
        break;  
    case 30:  
        output = "D";  
        break;  
}
```

```
info (strfmt("%1", i));  
info (output);
```

What is the output in the Infolog after running the code.

- A. 10 A
- B. 20 C
- C. 30 B
- D. 40 C

Answer: D

Question No : 22 - (Topic 1)

You want to see a list of all of the forms in the system, along with the current pattern type that is applied to them. What should you do?

- A. Run the form statistics add-in.
- B. Run the code comparison tool.
- C. Run the form patterns report.
- D. Run the help wiki.

Answer: D

Question No : 23 - (Topic 1)

You are planning to give a presentation on Microsoft Dynamics AX to your development team. What should you state as an advantage of creating and using labels?

- A. decreases database references
- B. provides multi-language and translation support
- C. reduces the number of pointers
- D. duplicates the value throughout the database

Answer: D

Question No : 24 - (Topic 1)

You have an X++ class, which has the following code:

You have an X++ class, which has the following code:

```
public class BomHierarchyCheck
{
    public static void checkBOM()
    {
        // do work
    }
    public static void main(Args args)
    {
        // do work
    }
}
```

You need to call checkBOM() method of the BomHierarchyCheck class from a static method class. Which code should you write within the static method to achieve this goal?

A)

```
BomHierarchyCheck::main();
```

B)

```
BomHierarchyCheck bomObject;
bomObject = new BomHierarchyCheck();
bomObject.checkBOM();
```

C)

```
BomHierarchyCheck bomObject;
bomObject = new BomHierarchyCheck();
bomObject.checkBOM();
```

D)

```
BomHierarchyCheck::checkBOM();
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: D

Question No : 25 - (Topic 1)

You are working with a new programmer and need to explain which types of objects can be aa< Which three objects should you discuss? Each correct answer presents a complete solution.

- A. References Rationale
- B. Models Rationale
- C. Project Rationale
- D. Application Object Tree (AOT)
- E. Elements Rationale

Answer: A,D,E

Question No : 26 - (Topic 1)

You are developing logic to update customer data with the click of a button.

You write the logic in a table method and call this method from the button click event You need the logic to catch the exception specific to an error in a transaction that uses optimistic concurrency control. You also need to ensure that the transaction will be retried.

Which type of exception handling should you use in your code?

- A. dderor
- B. UpdateConflictNotRecovered
- C. deadlock
- D. UpdateConflict

Answer: C

Question No : 27 - (Topic 1)
